Subject index to Volume 68, 1997, numbers 1 through 12

A

ABSTRACTS
1996 Orban competition and research forum. 397
ACQUIRED IMMUNODEFICIENCY SYNDROME
CD30+ Lymphocytes in chronic gingivitis from HIV-positive patients: A pilot study. Gomez RS, et al. 881
Periodontal status of HIV-1 and HIV-2 seropositive and HIV seronegative female commercial sex workers in Senegal. Ndiaye CF, et al. 827
ACTINOBACILLUS ACTINOMYCETEMCOMITANS
The effect of smoking on serum IgG2 reactive with *Actinobacillus actinomycetemcomitans* in early-onset periodontitis patients. Tangada SD, et al. 842
ADOLESCENTS
Alveolar bone patterns in sickle cell anemia and non-sickle cell anemia adolescent Nigerians: A comparative study. Arowojolu MO, et al. 225
Clinical classification of periodontitis in adolescents and young adults. Albandar JM, et al. 545
AEROSOLS
The effectiveness of an aerosol reduction device for ultrasonic scalers. King TB, et al. 45
AIR ABRASION
Scanning electron microscopic evaluation on the effects of an air-abrasive system on dental implants: A comparative in vitro study between machined and plasma-sprayed titanium surfaces. Chairay J-P, et al. 1215
AIR POLLUTION/prevention and control
The effectiveness of an aerosol reduction device for ultrasonic scalers. King TB, et al. 45
AIR POLLUTION, OCCUPATIONAL/prevention and control
The effectiveness of an aerosol reduction device for ultrasonic scalers. King TB, et al. 45
ALGORITHMS
Option-4 algorithm for automated disc probe: Reduction in the variance of site-specific relative attachment level measurements. Breen HJ, et al. 456
ALKALINE PHOSPHATASE
Effect(s) of the demineralization process on the osteoinductivity of demineralized bone matrix. Zhang M, et al. 1085
ALVEOLAR BONE
Spontaneous bony exposure: A report of 4 cases of idiopathic exposure and sequestration of alveolar bone. Sonnier KE, et al. 758
ALVEOLAR BONE/radiography
Reproducibility of bone height measurements made on serial radiographs. Hausmann E, et al. 839
ALVEOLAR BONE LOSS
Alveolar bone loss in rats infected with a strain of *Prevotella intermedia* and *Fusobacterium nucleatum* isolated from a child with prepubertal periodontitis. Yoshida-Minami I, et al. 12
Alveolar bone loss one year following ovariectomy in sheep. Johnson RB, et al. 864
Damping characteristics of teeth with periodontal breakdown: Correlation of mobility meter values with bone and attachment loss. Demirel K, et al. 166
Experimental peri-implantitis in consecutively placed, loaded root-form and plate-form implants in adult *Macaca mulatta* monkeys. Fritz ME, et al. 1131
Experimentally induced periodontitis in beagle dogs causes rapid increases in osteoclastic resorption of alveolar bone. Shibutani T, et al. 385
Local delivery of an amino bisphosphonate prevents the resorptive phase of alveolar bone following mucoperiosteal flap surgery in rats. Yaffe A, et al. 884
Periodontal findings in Cohen syndrome with chronic neutropenia. Alaluusua S, et al. 473
ALVEOLAR BONE LOSS/radiography
Radiographic measurement of alveolar bone loss in the living rat. Reymond F, et al. 141
ALVEOLAR BONE LOSS/therapy
Periodontal regeneration by application of recombinant human bone morphogenetic protein-2 to horizontal circumferential defects created by experimental periodontitis in beagle dogs. Kinoshita A, et al. 103
ALVEOLAR PROCESS/anatomy and histology
Alveolar bone patterns in sickle cell anemia and non-sickle cell anemia adolescent Nigerians: A comparative study. Arowojolu MO, et al. 225
Gingival overgrowth and dental alveolar alterations: Possible mechanisms of cyclosporin-induced tooth migration. An experimental study in the rate. Fu E, et al. 1231
ALVEOLAR RIDGE/anatomy and histology
A bone regenerative approach to alveolar ridge maintenance following tooth extraction, Report of 10 cases. Lekovic V, et al. 563
Crestal bone changes around titanium implants. A radiographic evaluation of unloaded nonsubmerged and submerged implants in the canine mandible. Hermann JS, et al. 1117
Quantitative measurement of volume changes induced by oral plastic surgery: Validation of an optical method using different geometrically-formed specimens. Studer SP, et al. 950
ALVEOLAR RIDGE AUGMENTATION
Comparison of porous bone material and biologically active glass in critical-sized defects. Schmitt JM, et al. 1043
Quantitative measurement of volume changes induced by oral plastic surgery: Validation of an optical

method using different geometrically-formed specimens. Studer SP, et al. 950
The thickness of masticatory mucosa in the human hard palate and tuberosity as potential donor sites for ridge augmentation procedures. Studer SP, et al. 145
AMERICAN ACADEMY OF PERIODONTOLOGY
Annual Report. 1254
1996 Orban competition and research forum abstracts. 397
1996–1997 President: Robert T. Ferris. 1
Position papers. 791, 1246
Program outline, 1997 Annual Meeting. 708
AMINO BISPHOSPHONATE/therapeutic use
Local delivery of an amino bisphosphonate prevents the resorptive phase of alveolar bone following mucoperiosteal flap surgery in rats. Yaffe A, et al. 884
AMLODIPINE/adverse effects
Prevalence of amlodipine-related gingival hyperplasia. Jorgensen MG. 676
ANEMIA, SICKLE CELL
Alveolar bone patterns in sickle cell anemia and nonsickle cell anemia adolescent Nigerians: A comparative study. Arowojolu MO, et al. 225
ANIMAL STUDIES
Alveolar bone loss one year following ovariectomy in sheep. Johnson RB, et al. 864
Biologic width around titanium implants. A histometric analysis of the implanto-gingival junction around unloaded and loaded nonsubmerged implants in the canine mandible. Cochran DL, et al. 186
A correlation study of inflammatory cell mobilization in response to subgingival microbial colonization. Leknes KN, et al. 67
Crestal bone changes around titanium implants. A radiographic evaluation of unloaded nonsubmerged and submerged implants in the canine mandible. Hermann JS, et al. 1117
Experimental peri-implant tissue breakdown around hydroxyapatite-coated implants. Hanisch O, et al. 59
Experimental peri-implantitis in consecutively placed, loaded root-form and plate-form implants in adult *Macaca mulatta* monkeys. Fritz ME, et al. 1131
Gingival overgrowth and dental alveolar alterations: Possible mechanisms of cyclosporin-induced tooth migration. An experimental study in the rat. Fu E, et al. 1231
Healing of intrabony defects and its relationship to root canal therapy. A histologic and histometric study in dogs. Lima LA, et al. 240
A histological investigation on tissue responses to titanium implants in cortical bone of the rat femur. Ohtsu A, et al. 270
The influence of chlorhexidine on the severity of cyclosporin A-induced gingival overgrowth. Pilatti GL, et al. 900
Laser irradiation of bone. I. An in vitro study concerning the effects of the CO_2 laser on oral mucosa and subjacent bone. Krause LS, et al. 872
Local delivery of an amino bisphosphonate prevents the resorptive phase of alveolar bone following mucoperiosteal flap surgery in rats. Yaffe A, et al. 884
Periodontal regeneration by application of recombinant human bone morphogenetic protein-2 to horizontal circumferential defects created by experimental periodontitis in beagle dogs. Kinoshita A, et al. 103
Periodontal regeneration in naturally occurring Class II furcation defects in beagle dogs after guided tissue regeneration with bioabsorbable barriers. Bogle G, et al. 536
Radiographic measurement of alveolar bone loss in the living rat. Reymond F, et al. 141
A short-term study of the effects of SBHAN, a novel compound, on gingival inflammation in the beagle dog. Cutler CW, et al. 448
The structure of bovine periodontal ligament with special reference to the epithelial cell rests. Berkovitz BKB, et al. 905
Vascular response to guided tissue regeneration procedures using nonresorbable and bioresorbable membranes in dogs. Vergara JA, et al. 217
ANTIBODIES, BACTERIAL
A comparison of IgG antibody reactive with *Bacteroides forsythus* and *Porphyromonas gingivalis* in adult and early-onset periodontitis. Califano JV, et al. 734
The relationship between gingivitis and the serum antibodies to the microbiota associated with periodontal disease in children with Down's syndrome. Morinushi T, et al. 626
Relationship between serum antibody levels and subgingival colonization of *Porphyromonas gingivalis* in patients with various types of periodontitis. Kojima T, et al. 618
ANTIGENS, CARBOHYDRATE
The effect of smoking on serum IgG2 reactive with *Actinobacillus actinomycetemcomitans* in early-onset periodontitis patients. Tangada SD, et al. 842
ANTIGENS, PROLIFERATING CELL NUCLEAR
Reactive change in proliferative activity of the junctional epithelium after topical application of lipopolysaccharide. Takata T, et al. 531
ANTIGENS, SV40 T
Development and characterization of a transformed human periodontal ligament cell line. Hoang AM, et al. 1054
AZITHROMYCIN/therapeutic use
Periodontal tissue disposition of azithromycin. Malizia T, et al. 1206

B

BACTERIAL ATTACHMENT
Differential attachment of oral *Treponemes* to monolayers of epithelial cells. Carranza N, Jr. 1010
BACTEROIDES FORSYTHUS
A comparison of IgG antibody reactive with *Bacteroides forsythus* and *Porphyromonas gingivalis* in

adult and early-onset periodontitis. Califano JV, et al. 734
Occurrence of *Porphyromonas gingivalis, Bacteroides forsythus,* and *Treponema denticola* in periodontally healthy and diseased subjects as determined by an ELISA technique. Di Murro C, et al. 18
Subgingival microbiota in adult Chinese: Prevalence and relation to periodontal disease progression. Papapanou PN, et al. 651
BASAL CELL NEVUS
Odontogenic keratocysts: Review of the literature and report of a case. Blanchard SB. 306
BIOCOMPATIBLE MATERIALS
Assessment of guided tissue regeneration procedures in intrabony defects with bioabsorbable and non-resorbable barriers. Weltman R, et al. 582
Phenotype expression of gingival fibroblasts cultured on membranes used in guided tissue regeneration. Locci P, et al. 857
BIOLOGICAL ASSAY
Effect(s) of the demineralization process on the osteoinductivity of demineralized bone matrix. Zhang M, et al. 1085
A quantitative assessment of osteoinductivity of human demineralized bone matrix. Zhang M, et al. 1076
BIOLOGIC WIDTH
Biologic width around titanium implants. A histometric analysis of the implanto-gingival junction around unloaded and loaded nonsubmerged implants in the canine mandible. Cochran DL, et al. 186
BIOPSY
Distribution of metallothionein in cigarette smokers and non-smokers in advanced periodontitis patients. Katsuragi H, et al. 1005
BLEEDING
Comparison of manual and automated probing in an untreated periodontitis population. Oringer RJ, et al. 1156
BLOOD FLOW
Gingival microcirculation response to tooth brushing measured by laser Doppler flowmetry. Perry DA, et al. 990
BLOOD GLUCOSE
The relationship between clinical periodontal status and insulin-dependent diabetes mellitus. Results after 5 years. Firatli E. 136
BLOOD VESSELS/anatomy and histology
The vasculature in chronic adult periodontitis: A qualitative and quantitative study. Bonakdar MPS, et al. 50
BONE AND BONES
Failing hollow implants examined by light microscopy and image processing. Takeshita F, et al. 293
Healing of intrabony defects and its relationship to root canal therapy. A histologic and histometric study in dogs. Lima LA, et al. 240
A histological investigation on tissue responses to titanium implants in cortical bone of the rat femur. Ohtsu A, et al. 270
Laser irradiation of bone. I. An in vitro study concerning the effects of the CO_2 laser on oral mucosa and subjacent bone. Krause LS, et al. 872
A study of the regional distribution of bone formed around hydroxyapatite implants in the tibiae of streptozotocin-induced diabetic rats using multiple fluorescent labeling and confocal laser scanning microscopy. Iyama S, et al. 1169
BONE, DEMINERALIZED
Comparison of bioresorbable laminar bone membrane and non-resorbable ePTFE membrane in mandibular furcations. Scott TA, et al. 679
Effects of guided bone regeneration around commercially pure titanium and hydroxyapatite-coated dental implants. I. Radiographic analysis. Stentz WC, et al. 199
Effects of guided bone regeneration around commercially pure titanium and hydroxyapatite-coated dental implants. II. Histologic analysis. Stentz WC, et al. 933
BONE DISEASES
Spontaneous bony exposure: A report of 4 cases of idiopathic exposure and sequestration of alveolar bone. Sonnier KE, et al. 758
BONE, FREEZE-DRIED
A clinical evaluation of guided tissue regeneration with a bioabsorbable matrix membrane combined with an allograft bone graft. A series of case reports. Harris RJ. 598
Effects of guided bone regeneration around commercially pure titanium and hydroxyapatite-coated dental implants. I. Radiographic analysis. Stentz WC, et al. 199
Effects of guided bone regeneration around commercially pure titanium and hydroxyapatite-coated dental implants. II. Histologic analysis. Stentz WC, et al. 933
BONE LOSS
Assessment of guided tissue regeneration procedures in intrabony defects with bioabsorbable and non-resorbable barriers. Weltman R, et al. 582
The association between estrogen status and alveolar bone density changes in postmenopausal women with a history of periodontitis. Payne JB, et al. 24
BONE MARROW TRANSPLANTATION
Periodontal considerations in the management of the cancer patient. Position paper. 791
BONE MATRIX
Effect(s) of the demineralization process on the osteoinductivity of demineralized bone matrix. Zhang M, et al. 1085
A quantitative assessment of osteoinductivity of human demineralized bone matrix. Zhang M, et al. 1076
BONE MINERALIZATION
Comparison of porous bone material and biologically active glass in critical-sized defects. Schmitt JM, et al. 1043
A quantitative assessment of osteoinductivity of human demineralized bone matrix. Zhang M, et al. 1076
BONE REGENERATION
Comparison of porous bone material and biologically

active glass in critical-sized defects. Schmitt JM, et al. 1043
Crestal bone changes around titanium implants. A radiographic evaluation of unloaded nonsubmerged and submerged implants in the canine mandible. Hermann JS, et al. 1117
The effects of diabetes on the interface between hydroxyapatite implants and bone in rat tibia. Takeshita F, et al. 180
Effects of guided bone regeneration around commercially pure titanium and hydroxyapatite-coated dental implants. I. Radiographic analysis. Stentz WC, et al. 199
Effects of guided bone regeneration around commercially pure titanium and hydroxyapatite-coated dental implants. II. Histologic analysis. Stentz WC, et al. 933
Effect(s) of the demineralization process on the osteoinductivity of demineralized bone matrix. Zhang M, et al. 1085
Healing of intrabony defects and its relationship to root canal therapy. A histologic and histometric study in dogs. Lima LA, et al. 240
Histological aspects of the bone and soft tissues surrounding three titanium non-submerged plasma-sprayed implants retrieved at autopsy: A case report. Piattelli A, et al. 694
Histological comparison of early wound healing following dense hydroxyapatite granule grafting and barrier placement in surgically-created bone defects neighboring implants. Takeshita F, et al. 924
Periodontal regeneration by application of recombinant human bone morphogenetic protein-2 to horizontal circumferential defects created by experimental periodontitis in beagle dogs. Kinoshita A, et al. 103
Protease profiles of cells isolated from regenerative membranes are associated with clinical outcomes. Grosso LT, et al. 809
A study of the regional distribution of bone formed around hydroxyapatite implants in the tibiae of streptozotocin-induced diabetic rats using multiple fluorescent labeling and confocal laser scanning microscopy. Iyama S, et al. 1169

BONE REMODELING
Crestal bone changes around titanium implants. A radiographic evaluation of unloaded nonsubmerged and submerged implants in the canine mandible. Hermann JS, et al. 1117
A histological investigation on tissue responses to titanium implants in cortical bone of the rat femur. Ohtsu A, et al. 270
Immediate loading of titanium plasma-sprayed screw-shaped implants in man: A clinical and histological report of two cases. Piattelli A, et al. 591
Local delivery of an amino bisphosphonate prevents the resorptive phase of alveolar bone following mucoperiosteal flap surgery in rats. Yaffe A, et al. 884

BONE RESORPTION
Cytokine production by oral and peripheral blood neutrophils in adult periodontitis. Galbraith GMP, et al. 832
Experimentally induced periodontitis in beagle dogs causes rapid increases in osteoclastic resorption of alveolar bone. Shibutani T, et al. 385
Healing of intrabony defects and its relationship to root canal therapy. A histologic and histometric study in dogs. Lima LA, et al. 240
Local delivery of an amino bisphosphonate prevents the resorptive phase of alveolar bone following mucoperiosteal flap surgery in rats. Yaffe A, et al. 884
The ways and wherefores of immediate placement of implants into fresh extraction sites: A literature review. Schwartz-Arad D, et al. 915

BONE TRANSPLANTATION
Placement of implants into fresh extraction sites: 4 to 7 years retrospective evaluation of 95 immediate implants. Schwarzerad D, et al. 1110

BOOK REVIEW 802

C

CALCIUM/analysis
A quantitative assessment of osteoinductivity of human demineralized bone matrix. Zhang M, et al. 1076

CAMPYLOBACTER RECTUS
Association of oral spirochetes from sites of periodontal health with development of periodontitis. Riviere GR, et al. 1210
Subgingival microbiota in adult Chinese: Prevalence and relation to periodontal disease progression. Papapanou PN, et al. 651

CD ANTIGENS
CD40 mediated activation of gingival and periodontal ligament fibroblasts. Sempowski GD, et al. 284

CELL CYCLE ANALYSIS
Effect of inflammation on the proliferation of human gingival epithelial cells in vitro. Carro OM, et al. 1070

CELL MIGRATION
An investigation of preferential fibroblast wound repopulation using a novel in vitro wound model. al-Khateeb T, et al. 1063
Migration of gingival fibroblasts on fibronectin and laminin. Dean JW, III, et al. 750

CELLS, CULTURED
Cells with osteoblastic phenotypes can be explanted from human gingiva and periodontal ligament. Carnes DL, et al. 701
Development and characterization of a transformed human periodontal ligament cell line. Hoang AM, et al. 1054
Effect of inflammation on the proliferation of human gingival epithelial cells in vitro. Carro OM, et al. 1070
Expression of extracellular matrix proteins in human periodontal ligament cells during mineralization in vitro. Nohutcu RM, et al. 320

CELLS, EPITHELIAL

Differential attachment of oral *Treponemes* to monolayers of epithelial cells. Carranza N, Jr. 1010
Effect of inflammation on the proliferation of human gingival epithelial cells in vitro. Carro OM, et al. 1070
CETYLPYRIDINIUM CHLORIDE/therapeutic use
In vitro antifungal properties of mouthrinses containing antimicrobial agents. Giuliana G, et al. 728
CHEMOTHERAPY/adverse effects
Periodontal considerations in the management of the cancer patient. Position paper. 791
CHILDREN
Oral food consumption and the subgingival flora: Subgingival microbiota of gastrostomy tube-fed children and healthy controls. Chen C, et al. 1163
CHLORHEXIDINE/therapeutic use
The influence of chlorhexidine on the severity of cyclosporin A-induced gingival overgrowth. Pilatti GL, et al. 900
Sustained local delivery of chlorhexidine in the treatment of periodontitis: A multi-center study. Soskolne WA, et al. 32
Treatment of periodontal disease in diabetes reduces glycated hemoglobin. Grossi SG, et al. 713
CITRIC ACID/therapeutic use
Clinical and microbiological effects of subgingival antimicrobial irrigation with citric acid as evaluated by an enzyme immunoassay and culture analysis. Renvert S, et al. 346
Clinical evaluation of tetracycline HCl conditioning in the treatment of gingival recessions. A comparative study. Bouchard P, et al. 262
In vitro antifungal properties of mouthrinses containing antimicrobial agents. Giuliana G, et al. 728
Progressive cervical root resorption related to tetracycline root conditioning. Ben-Yehouda A. 432; erratum. 808
The survival rate of *Actinobacillus actinomycetemcomitans, Porphyromonas gingivalis,* and *Bacteroides forsythus* following 4 randomized treatment modalities. Shiloah J, et al. 720
CLINICAL TRIALS
Assessment of guided tissue regeneration procedures in intrabony defects with bioabsorbable and non-resorbable barriers. Weltman R, et al. 582
Clinical evaluation of tetracycline HCl conditioning in the treatment of gingival recessions. A comparative study. Bouchard P, et al. 262
Comparison of a bioabsorbable GTR barrier to a non-absorbable barrier in treating human Class II furcation defects. A multi-center parallel design randomized single-blind trial. Garrett S, et al. 667
Multi-center comparative evaluation of subgingivally delivered sanguinarine and doxycycline in the treatment of periodontitis. I. Study design, procedures, and management. Polson AM, et al. 110
Multi-center comparative evaluation of subgingivally delivered sanguinarine and doxycycline in the treatment of periodontitis. II. Clinical results. Polson AM, et al. 119
A phase I/II clinical trial to evaluate a combination of recombinant human platelet-derived growth factor-BB and recombinant human insulin-like growth factor-I in patients with periodontal disease. Howell TH, et al. 1186
The use of tetracycline-containing controlled-release fibers in the treatment of refractory periodontitis. Vandekerckhove BNA, et al. 353
COCAINE/adverse effects
Cocaine-associated rapid gingival recession and dental erosion. A case report. Kapila YL, et al. 485
COHEN SYNDROME
Periodontal findings in Cohen syndrome with chronic neutropenia. Alaluusua S, et al. 473
COLLAGEN
Bacterial adherence to guided tissue regeneration barrier membranes exposed to the oral environment. Chen Y-T, et al. 172
Increased proliferation, collagen, and fibronectin production by hereditary gingival fibromatosis fibroblasts. Tipton DA. 524
Phenotype expression of gingival fibroblasts cultured on membranes used in guided tissue regeneration. Locci P, et al. 857
COLLAGEN/therapeutic use
Development and clinical evaluation of a root coverage procedure using a collagen barrier membrane. Shieh A-T, et al. 770
Effects of combined topical metronidazole and mechanical treatment on the subgingival flora in deep periodontal pockets in cuspids and bicuspids. Hitzig C, et al. 613
COMPARISON STUDY
Alveolar bone patterns in sickle cell anemia and non-sickle cell anemia adolescent Nigerians: A comparative study. Arowojolu MO, et al. 225
Clinical evaluation of tetracycline HCl conditioning in the treatment of gingival recessions. A comparative study. Bouchard P, et al. 262
A comparative study of root coverage obtained with guided tissue regeneration utilizing a bioabsorbable membrane versus the connective tissue with partial-thickness double pedicle graft. Harris RJ. 779
Comparative in vitro effectiveness of closed root debridement with fine instruments on specific areas of mandibular first molar furcations. I. Root trunk and furcation entrance. Otero-Cagide FJ, et al. 1093
Comparative in vitro effectiveness of closed root debridement with fine instruments on specific areas of mandibular first molar furcations. II. Furcation area. Otero-Cagide FJ, et al. 1098
Comparison of manual and automated probing in an untreated periodontitis population. Oringer RJ, et al. 1156
Comparison of porous bone material and biologically active glass in critical-sized defects. Schmitt JM, et al. 1043
Correlation between measurements using a new halitosis monitor and organoleptic assessment. Shimura M, et al. 1182

Crestal bone changes around titanium implants. A radiographic evaluation of unloaded nonsubmerged and submerged implants in the canine mandible. Hermann JS, et al. 1117
The effect of smoking on mechanical and antimicrobial periodontal therapy. Kinane DF, et al. 467
The effects of different tetracyclines on the dentin root surface of instrumented, periodontally involved human teeth: A comparative scanning electron microscope study. Madison JG, III, et al. 739
Experimental peri-implantitis in consecutively placed, loaded root-form and plate-form implants in adult *Macaca mulatta* monkeys. Fritz ME, et al. 1131
Important differences in clinical data from third, second, and first generation periodontal probes. Breen HJ, et al. 335
Protease profiles of cells isolated from regenerative membranes are associated with clinical outcomes. Grosso LT, et al. 809
Reduction of oral malodor by oxidizing lozenges. Greenstein RB-N, et al. 1176
Scanning electron microscopic evaluation on the effects of an air-abrasive system on dental implants: A comparative in vitro study between machined and plasma-sprayed titanium surfaces. Chairay J-P, et al. 1215

COMPUTER-ASSISTED DENSITOMETRIC IMAGE ANALYSIS
The association between estrogen status and alveolar bone density changes in postmenopausal women with a history of periodontitis. Payne JB, et al. 24

CONNECTIVE TISSUE
Integrated connective tissue in bioabsorbable barrier material and periodontal regeneration. Zucchelli G, et al. 996

CONNECTIVE TISSUE/anatomy and histology
Morphometric analysis of cellular and vascular changes in gingival connective tissue in long-term insulin-dependent diabetes. Seppälä B, et al. 1237

CONNECTIVE TISSUE/microbiology
A correlation study of inflammatory cell mobilization in response to subgingival microbial colonization. Leknes KN, et al. 67

CONNECTIVE TISSUE/radiation effects
Carbon dioxide laser for de-epithelialization of periodontal flaps. Centty IG, et al. 763

CONNECTIVE TISSUE/surgery
Clinical evaluation of tetracycline HCl conditioning in the treatment of gingival recessions. A comparative study. Bouchard P, et al. 262
A comparative study of root coverage obtained with guided tissue regeneration utilizing a bioabsorbable membrane versus the connective tissue with partial-thickness double pedicle graft. Harris RJ. 779
Creeping attachment associated with the connective tissue with partial-thickness double pedicle graft. Harris RJ. 890
Report of a gingival "surgical cyst" developing secondarily to a subepithelial connective tissue graft. Breault LG, et al. 392

CYCLOSPORINE A
Comparative results of cyclosporine on glycosaminoglycan synthesis by gingival fibroblasts. Newell J, et al. 443

CYCLOSPORINE A/adverse effects
The effect of plaque retention on cyclosporine-induced gingival overgrowth in rats. Fu E, et al. 92
Gingival overgrowth and dental alveolar alterations: Possible mechanisms of cyclosporine-induced tooth migration. An experimental study in the rat. Fu E, et al. 1231
The influence of chlorhexidine on the severity of cyclosporine A-induced gingival overgrowth. Pilatti GL, et al. 900
Periodontal management of gingival overgrowth in the heart transplant patient: A case report. Khocht A, et al. 1140
Phenytoin and cyclosporine A specifically regulate macrophage phenotype and expression of platelet-derived growth factor and interleukin-1 in vitro and in vivo: Possible molecular mechanism of drug-induced gingival hyperplasia. Iacopino AM, et al. 73
Positive correlation between blood cyclosporine A level and severity of gingival overgrowth in rats. Morisaki I, et al. 7

D

DENTAL CALCULUS/prevention and control
Clinical evaluation of the speed and effectiveness of subgingival calculus removal on single-rooted teeth with diamond-coated ultrasonic tips. Yukna RA, et al. 436
Root planing following short-term pocket distention. Shen E-C, et al. 632

DENTAL ENAMEL/abnormalities
Cervical enamel projection and intermediate bifurcational ridge correlated with molar furcation involvements. Hou G-L, et al. 687

DENTAL HEALTH SURVEYS
Periodontal status of HIV-1 and HIV-2 seropositive and HIV seronegative female commercial sex workers in Senegal. Ndiaye CF, et al. 827
A 10-year study of the progression of destructive periodontal disease in adult and elderly Chinese. Baelum V, et al. 1033

DENTAL IMPLANTS
Abscess formation around a hydroxyapatite-coated implant placed into the extraction socket with autogenous bone graft. A histological study using light microscopy, image processing, and confocal laser scanning microscopy. Takeshita F, et al. 299
Blur reduction of conventional film-based tomograms for presurgical evaluation of potential mandibular implant sites. Mayfield-Donahoo TL, et al. 362
The effect of surface roughness on early in vivo plaque colonization on titanium. Rimondini L, et al. 556
The effects of diabetes on the interface between hy-

droxyapatite implants and bone in rat tibia. Takeshita F, et al. 180
Effects of guided bone regeneration around commercially pure titanium and hydroxyapatite-coated dental implants. I. Radiographic analysis. Stentz WC, et al. 199
Effects of guided bone regeneration around commercially pure titanium and hydroxyapatite-coated dental implants. II. Histologic analysis. Stentz WC, et al. 933
Experimental peri-implant tissue breakdown around hydroxyapatite-coated implants. Hanisch O, et al. 59
Experimental peri-implantitis in consecutively placed, loaded root-form and plate-form implants in adult *Macaca mulatta* monkeys. Fritz ME, et al. 1131
Placement of dental implants into fresh extraction sites: 4 to 7 years retrospective evaluation of 95 immediate implants. Schwartz-Arad D, et al. 1110
Scanning electron microscopic evaluation on the effects of an air-abrasive system on dental implants: A comparative in vitro study between machined and plasma-sprayed titanium surfaces. Chairay J-P, et al. 1215
DENTAL IMPLANTS/anatomy and histology
Histological aspects of the bone and soft tissues surrounding three titanium non-submerged plasma-sprayed implants retrieved at autopsy: A case report. Piattelli A, et al. 694
A histological investigation on tissue responses to titanium implants in cortical bone of the rat femur. Ohtsu A, et al. 270
Immediate loading of titanium plasma-sprayed screw-shaped implants in man: A clinical and histological report of two cases. Piattelli A, et al. 591
DENTAL IMPLANTS/methods
Crestal bone changes around titanium implants. A radiographic evaluation of unloaded nonsubmerged and submerged implants in the canine mandible. Hermann JS, et al. 1117
DENTAL IMPLANTS/microbiology
Periodontal bacteria colonizing oral mucous membranes in edentulous patients wearing dental implants. Danser MM, et al. 209
DENTAL IMPLANTS, AUTOGENOUS
The ways and wherefores of immediate placement of implants into fresh extraction sites: A literature review. Schwartz-Arad D, et al. 915
DENTAL IMPLANTS, ENDOSSEOUS
Biologic width around titanium implants. A histometric analysis of the implanto-gingival junction around unloaded and loaded nonsubmerged implants in the canine mandible. Cochran DL, et al. 186
Failing hollow implants examined by light microscopy and image processing. Takeshita F, et al. 293
DENTAL INSTRUMENTS
Comparative in vitro effectiveness of closed root debridement with fine instruments on specific areas of mandibular first molar furcations. I. Root trunk and furcation entrance. Otero-Cagide FJ, et al. 1093
Comparative in vitro effectiveness of closed root debridement with fine instruments on specific areas of mandibular first molar furcations. II. Furcation area. Otero-Cagide FJ, et al. 1098
DENTAL PLAQUE
The effect of plaque retention on cyclosporine-induced gingival overgrowth in rats. Fu E, et al. 92
The influence of anatomic and iatrogenic surface characteristics on bacterial colonization and periodontal destruction: A review. Leknes KN. 507
DENTAL PLAQUE/microbiology
Association of oral spirochetes from sites of periodontal health with development of periodontitis. Riviere GR, et al. 1210
A correlation study of inflammatory cell mobilization in response to subgingival microbial colonization. Leknes KN, et al. 67
The effect of surface roughness on early in vivo plaque colonization on titanium. Rimondini L, et al. 556
Oral carriage of *Heliobacter pylori*: A review. Madinier IM, et al. 2
DENTAL PLAQUE/prevention and control
The influence of chlorhexidine on the severity of cyclosporin A-induced gingival overgrowth. Pilatti GL, et al. 900
DENTAL PROBES
Comparison of manual and automated probing in an untreated periodontitis population. Oringer RJ, et al. 1156
Important differences in clinical data from third, second, and first generation periodontal probes. Breen HJ, et al. 335
Option-4 algorithm for automated disc probe: Reduction in the variance of site-specific relative attachment level measurements. Breen HJ, et al. 456
DENTIN
The effects of different tetracyclines on the dentin root surface of instrumented, periodontally involved human teeth: A comparative scanning electron microscope study. Madison JG, III, et al. 739
DIABETES MELLITUS
The effects of diabetes on the interface between hydroxyapatite implants and bone in rat tibia. Takeshita F, et al. 180
DIABETES MELLITUS, INSULIN-DEPENDENT
Inflammatory mediator response as a potential risk marker for periodontal diseases in insulin-dependent diabetes mellitus patients. Salvi GE, et al. 127
Manifestations of insulin-dependent diabetes mellitus in the periodontium of young Brazilian patients. A 10-year follow-up study. Novaes AB, Jr., et al. 328
Morphometric analysis of cellular and vascular changes in gingival connective tissue in long-term insulin-dependent diabetes. Seppälä B, et al. 1237
The relationship between clinical periodontal status and insulin-dependent diabetes mellitus. Results after 5 years. Firatli E. 136
The relationship between gingivitis and the serum antibodies to the microbiota associated with periodontal disease in children with Down's syndrome. Morinushi T, et al. 626

DIABETES MELLITUS, INSULIN-DEPENDENT/epidemiology
Treatment of periodontal disease in diabetes reduces glycated hemoglobin. Grossi SG, et al. 713
DIABETES MELLITUS, STREPTOZOTOCIN-INDUCED
A study of the regional distribution of bone formed around hydroxyapatite implants in the tibiae of streptozotocin-induced diabetic rats using multiple fluorescent labeling and confocal laser scanning microscopy. Iyama S, et al. 1169
DIET
Oral food consumption and the subgingival flora: Subgingival microbiota of gastrostomy tube-fed children and healthy controls. Chen C, et al. 1163
DIHYDROTESTOSTERONE
The effects of epidermal growth factor, Interleukin-1, and phenytoin alone and in combination on C_{19} steroid conversions in fibroblasts. Soory M, et al. 819
DNA
Phenotype expression of gingival fibroblasts cultured on membranes used in guided tissue regeneration. Locci P, et al. 857
DNA PROBES
Subgingival microbiota in adult Chinese: Prevalence and relation to periodontal disease progression. Papapanou PN, et al. 651
DOPPLER FLOWMETRY
Gingival microcirculation response to tooth brushing measured by laser Doppler flowmetry. Perry DA, et al. 990
DOXYCYCLINE/therapeutic use
The effects of different tetracyclines on the dentin root surface of instrumented, periodontally involved human teeth: A comparative scanning electron microscope study. Madison JG, III, et al. 739
Multi-center comparative evaluation of subgingivally delivered sanguinarine and doxycycline in the treatment of periodontitis. I. Study design, procedures, and management. Polson AM, et al. 110
Multi-center comparative evaluation of subgingivally delivered sanguinarine and doxycycline in the treatment of periodontitis. II. Clinical results. Polson AM, et al. 119; Polson AM, et al. 110
Treatment of periodontal disease in diabetes reduces glycated hemoglobin. Grossi SG, et al. 713
DRUG DELIVERY SYSTEMS
Sustained local delivery of chlorhexidine in the treatment of periodontitis: A multi-center study. Soskolne WA, et al. 32
DRUG DELIVERY SYSTEMS, BIODEGRADABLE
Multi-center comparative evaluation of subgingivally delivered sanguinarine and doxycycline in the treatment of periodontitis. I. Study design, procedures, and management. Polson AM, et al. 110
Multi-center comparative evaluation of subgingivally delivered sanguinarine and doxycycline in the treatment of periodontitis. II. Clinical results. Polson AM, et al. 119; Polson AM, et al. 110
DRUG EVALUATION
A mucosal irritancy test device for intraoral use in drugs. Wirthlin MR, et al. 746
DRUG TOXICITY
A mucosal irritancy test device for intraoral use in drugs. Wirthlin MR, et al. 746

E

ECM
An investigation of preferential fibroblast wound repopulation using a novel in vitro wound model. al-Khateeb T, et al. 1063
EIKENELLA CORRODENS
Association of oral spirochetes from sites of periodontal health with dvelopment of periodontitis. Riviere GR, et al. 1210
ELASTASE/analysis
Active and α-1 proteinase inhibitor complexed leukocyte elastase levels in crevicular fluid from patients with periodontal diseases. Meyer J, et al. 256
ENDOTHELIUM, VASCULAR
The vasculature in chronic adult periodontitis: A qualitative and quantitative study. Bonakdar MPS, et al. 50
EPIDERMAL GROWTH FACTOR
The effects of epidermal growth factor, interleukin-1, and phenytoin alone and in combination on C_{19} steroid conversions in fibroblasts. Soory M, et al. 819
EPITHELIAL ATTACHMENT
Reactive change in proliferative activity of the junctional epithelium after topical application of lipopolysaccharide. Takata T, et al. 531
EPITHELIAL ATTACHMENT/cytology
Culture and characterization of human junctional epithelial cells. Matsuyama T, et al. 229
EPITHELIAL ATTACHMENT/immunology
Culture and characterization of human junctional epithelial cells. Matsuyama T, et al. 229
EPITHELIAL ATTACHMENT/ultrastructure
Culture and characterization of human junctional epithelial cells. Matsuyama T, et al. 229
EPITHELIAL CELLS/ultrastructure
The structure of bovine periodontal ligament with special reference to the epithelial cell rests. Berkovitz BKB, et al. 905
EPITHELIUM/anatomy and histology
Distribution of metallothionein in cigarette smokers and non-smokers in advance periodontitis patients. Katsuragi H, et al. 1005
EPITHELIUM/microbiology
A correlation study of inflammatory cell mobilization in response to subgingival microbial colonization. Leknes KN, et al. 67
EPITHELIUM/radiation effects
Carbon dioxide laser for de-epithelialization of periodontal flaps. Centty IG, et al. 763
ERRATUM 808
ESTHETICS, DENTAL
Development and clinical evaluation of a root coverage

procedure using a collagen barrier membrane. Shieh A-T, et al. 770
ESTROGEN DEFICIENCY
Alveolar bone loss one year following ovariectomy in sheep. Johnson RB, et al. 864
ESTROGENS/adverse effects
The association between estrogen status and alveolar bone density changes in postmenopausal women with a history of periodontitis. Payne JB, et al. 24
EXOSTOSES
Spontaneous bony exposure: A report of 4 cases of idiopathic exposure and sequestration of alveolar bone. Sonnier KE, et al. 758
EXTRACELLULAR MATRIX PROTEINS
Effects of interleukin-1 on matrix metalloproteinase-3-levels in human periodontal ligament cells. Nakaya H, et al. 517

F

FACTITIOUS DISORDERS
Role of psychiatric disorders in self-inflicted periodontal injury: A case report. Sandhu HS, et al. 1136
FIBROBLASTS
CD40 mediated activation of gingival and periodontal ligament fibroblasts. Sempowski GD, et al. 284
Cells with osteoblastic phenotypes can be explanted from human gingiva and periodontal ligament. Carnes DL, et al. 701
Comparative results of cyclosporin on glycosaminoglycan synthesis by gingival fibroblasts. Newell J, et al. 443
The effects of epidermal growth factor, interleukin-1, and phenytoin alone and in combination on C steroid conversions in fibroblasts. Soory M, et al. 819
Effects of hydroxyapatite particles on periodontal ligament fibroblast-like cell behavior. Alliot-Licht B, et al. 158
Increased proliferation, collagen, and fibronectin production by hereditary gingival fibromatosis fibroblasts. Tipton DA, 524
An investigation of preferential fibroblast wound repopulation using a novel in vitro wound model. al-Khateeb T, et al. 1063
Migration of gingival fibroblasts on fibronectin and laminin. Dean JW, III, et al. 750
Myofibroblasts in phenytoin-induced hyperplastic connective tissue in the rat and in human gingival overgrowth. Dill RE, et al. 375
Phenotype expression of gingival fibroblasts cultured on membranes used in guided tissue regeneration. Locci P, et al. 857
FIBROBLASTS/ultrastructure
The structure of bovine periodontal ligament with special reference to the epithelial cell rests. Berkovitz BKB, et al. 905
FIBROMA
Odontogenic myxofibroma arising from the periodontal ligament in the maxillary molar region. Okada H, et al. 479
FIBROMATOSIS
Increased proliferation, collagen, and fibronectin production by hereditary gingival fibromatosis fibroblasts. Tipton DA, et al. 524
FIBRONECTIN
Increased proliferation, collagen, and fibronectin production by hereditary gingival fibromatosis fibroblasts. Tipton DA, 524
Migration of gingival fibroblasts on fibronectin and laminin. Dean JW, III, et al. 750
FOLLOW-UP STUDIES
The association between estrogen status and alveolar bone density changes in postmenopausal women with a history of periodontitis. Payne JB, et al. 24
Clinical classification of periodontitis in adolescents and young adults. Albandar JM, et al. 545
Manifestations of insulin-dependent diabetes mellitus in the periodontium of young Brazilian patients. A 10-year follow-up study. Novaes AB, Jr., et al. 328
Multi-center comparative evaluation of subgingivally delivered sanguinarine and doxycycline in the treatment of periodontitis. I. Study design, procedures, and management. Polson AM, et al. 110
Multi-center comparative evaluation of subgingivally delivered sanguinarine and doxycycline in the treatment of periodontitis. II. Clinical results. Polson AM, et al. 119
Placement of implants into fresh extraction sites: 4 to 7 years retrospective evaluation of 95 immediate implants. Schwartz-Arad D, et al. 1110
The relationship between clinical periodontal status and insulin-dependent diabetes mellitus. Results after 5 years. Firatli E. 136
Subgingival microbiota in adult Chinese: Prevalence and relation to periodontal disease progression. Papapanou PN, et al. 651
A 10-year study of the progression of destructive periodontal disease in adult and elderly Chinese. Baelum V, et al. 1033
Tetracycline fibers plus scaling and root planing versus scaling and root planing alone: Similar results after 5 years. Wilson TG, Jr., et al. 1029
The use of tetracycline-containing controlled-release fibers in the treatment of refractory periodontitis. Vandekerckhove BNA, et al. 353
FORECASTING
Tooth loss due to periodontal abscess: A retrospective study. McLeod DE, et al. 963
FRUCTOSAMINE
The relationship between clinical periodontal status and insulin-dependent diabetes mellitus. Results after 5 years. Firatli E. 136
FUNGAL DISEASES/prevention and control
In vitro antifungal properties of mouthrinses containing antimicrobial agents. Giuliana G, et al. 728
FURCATION
Tooth loss due to periodontal abscess: A retrospective study. McLeod DE, et al. 963

FURCATION/diagnosis
Cervical enamel projection and intermediate bifurcational ridge correlated with molar furcation involvements. Hou G-L, et al. 687
FURCATION/surgery
Comparison of a bioabsorbable GTR barrier to a non-absorbable barrier in treating human Class II furcation defects. A multi-center parallel design randomized single-blind trial. Garrett S, et al. 667
FURCATION/therapy
Comparative in vitro effectiveness of closed root debridement with fine instruments on specific areas of mandibular first molar furcations. I. Root trunk and furcation entrance. Otero-Cagide FJ, et al. 1093
Comparative in vitro effectiveness of closed root debridement with fine instruments on specific areas of mandibular first molar furcations. II. Furcation area. Otero-Cagide FJ, et al. 1098
Comparison of a bioabsorbable GTR barrier to a non-absorbable barrier in treating human Class II furcation defects. A multi-center parallel design randomized single-blind trial. Garrett S, et al. 667
Comparison of bioabsorbable laminar bone membrane and non-resorbable ePTFE membrane in mandibular furcations. Scott TA, et al. 679
Evidence for healing of Class II and III furcations after GTR therapy: Digital subtraction and clinical measurements. Eickholz P, et al. 636
Guided periodontal tissue regeneration in Class II furcation defects following treatment with a synthetic bioabsorbable membrane. Hürzeler MB, et al. 498
FUSOBACTERIUM NUCLEATUM
Alveolar bone loss in rats infected with a strain of *Prevotella intermedia* and *Fusobacterium nucleatum* isolated from a child with prepubertal periodontitis. Yoshida-Minami I, et al. 12
Fusobacterium nucleatum T18 aggregates human mononuclear cells and inhibits their PHS-stimulated proliferation. Haake SK, et al. 39

G

GASTRITIS
Oral carriage of *Heliobacter pylori*: A review. Madinier IM, et al. 2
GASTROESOPHAGEAL REFLUX
Oral carriage of *Heliobacter pylori*: A review. Madinier IM, et al. 2
GASTROSTOMY
Oral food consumption and the subgingival flora: Subgingival microbiota of gastrostomy tube-fed children and healthy controls. Chen C, et al. 1163
GENE EXPRESSION
Phenytoin and cyclosporine A specifically regulate macrophage phenotype and expression of platelet-derived growth factor and interleukin-1 in vitro and in vivo: Possible molecular mechanism of drug-induced gingival hyperplasia. Iacopino AM, et al. 73
GINGIVA
CD40 mediated activation of gingival and periodontal ligament fibroblasts. Sempowski GD, et al. 284
GINGIVA/anatomy and histology
Cells with osteoblastic phenotypes can be explanted from human gingiva and periodontal ligament. Carnes DL, et al. 701
Distribution of metallothionein in cigarette smokers and non-smokers in advance periodontitis patients. Katsuragi H, et al. 1005
Gingival microcirculation response to tooth brushing measured by laser Doppler flowmetry. Perry DA, et al. 990
Gingival overgrowth and dental alveolar alterations: Possible mechanisms of cyclosporin-induced tooth migration. An experimental study in the rat. Fu E, et al. 1231
Morphometric analysis of cellular and vascular changes in gingival connective tissue in long-term insulin-dependent diabetes. Seppälä B, et al. 1237
GINGIVA/cytology
Culture and characterization of human junctional epithelial cells. Matsuyama T, et al. 229
GINGIVA/immunology
Culture and characterization of human junctional epithelial cells. Matsuyama T, et al. 229
GINGIVA/microbiology
Periodontal tissue disposition of azithromycin. Malizia T, et al. 1206
GINGIVA/ultrastructure
Culture and characterization of human junctional epithelial cells. Matsuyama T, et al. 229
GINGIVAL CREVICULAR FLUID/analysis
Active and α-1 proteinase inhibitor complexed leukocyte elastase levels in crevicular fluid from patients with periodontal diseases. Meyer J, et al. 256
Experimentally induced periodontitis in beagle dogs causes rapid increases in osteoclastic resorption of alveolar bone. Shibutani T, et al. 385
Inflammatory and immune mediators in crevicular fluid from HIV-infected injecting drug users. Grbic JT, et al. 249
Inflammatory mediator response as a potential risk marker for periodontal diseases in insulin-dependent diabetes mellitus patients. Salvi GE, et al. 127
GINGIVAL CYSTS/etiology
Report of a gingival "surgical cyst" developing secondarily to a subepithelial connective tissue graft. Breault LG, et al. 392
GINGIVAL HYPERPLASIA
Increased proliferation, collagen, and fibronectin production by hereditary gingival fibromatosis fibroblasts. Tipton DA, et al. 524
The influence of chlorhexidine on the severity of cyclosporin A-induced gingival overgrowth. Pilatti GL, et al. 900
GINGIVAL HYPERPLASIA/drug therapy
Regression of nifedipine-induced gingival hyperplasia following switch to a same class calcium channel blocker, isradipine. Westbrook P, et al. 645
GINGIVAL HYPERPLASIA/etiology

The effect of plaque retention on cyclosporine-induced gingival overgrowth in rats. Fu E, et al. 92
Myofibroblasts in phenytoin-induced hyperplastic connective tissue in the rat and in human gingival overgrowth. Dill RE, et al. 375
Periodontal management of gingival overgrowth in the heart transplant patient: A case report. Khocht A, et al. 1140
Phenytoin and cyclosporine A specifically regulate macrophage phenotype and expression of platelet-derived growth factor and interleukin-1 in vitro and in vivo: Possible molecular mechanism of drug-induced gingival hyperplasia. Iacopino AM, et al. 73
Positive correlation between blood cyclosporin A level and severity of gingival overgrowth in rats. Morisaki I, et al. 7
Prevalence of amlodipine-related gingival hyperplasia. Jorgensen MG. 676
GINGIVAL HYPERPLASIA/pathogenesis
Comparative results of cyclosporin on glycosaminoglycan synthesis by gingival fibroblasts. Newell J, et al. 443
GINGIVAL RECESSION/diagnosis
Cocaine-associated rapid gingival recession and dental erosion. A case report. Kapila YL, et al. 485
GINGIVAL RECESSION/surgery
Clinical evaluation of tetracycline HCl conditioning in the treatment of gingival recessions. A comparative study. Bouchard P, et al. 262
A comparative study of root coverage obtained with guided tissue regeneration utilizing a bioabsorbable membrane versus the connective tissue with partial-thickness double pedicle graft. Harris RJ. 779
Creeping attachment associated with the connective tissue with partial-thickness double pedicle graft. Harris RJ. 890
Development and clinical evaluation of a root coverage procedure using a collagen barrier membrane. Shieh A-T, et al. 770
Guided tissue regeneration using a bioabsorbable membrane in the treatment of human buccal recession. A re-entry study. Waterman CA. 982
GINGIVAL RECESSION/therapy
Clinical evaluation of tetracycline HCl conditioning in the treatment of gingival recessions. A comparative study. Bouchard P, et al. 262
A comparative study of root coverage obtained with guided tissue regeneration utilizing a bioabsorbable membrane versus the connective tissue with partial-thickness double pedicle graft. Harris RJ. 779
Development and clinical evaluation of a root coverage procedure using a collagen barrier membrane. Shieh A-T, et al. 770
Guided tissue regeneration using a bioabsorbable membrane in the treatment of human buccal recession. A re-entry study. Waterman CA. 982
GINGIVITIS/drug therapy
A short-term study of the effects of SBHAN, a novel compound, on gingival inflammation in the beagle dog. Cutler CW, et al. 448
GINGIVITIS/epidemiology
CD30+ Lymphocytes in chronic gingivitis from HIV-positive patients: A pilot study. Gomez RS, et al. 881
GINGIVITIS/etiology
The relationship between gingivitis and the serum antibodies to the microbiota associated with periodontal disease in children with Down's syndrome. Morinushi T, et al. 626
GINGIVITIS/microbiology
A correlation study of inflammatory cell mobilization in response to subgingival microbial colonization. Leknes KN, et al. 67
Occurrence of *Porphyromonas gingivalis, Bacteroides forsythus,* and *Treponema denticola* in periodontally healthy and diseased subjects as determined by an ELISA technique. Di Murro C, et al. 18
Oral food consumption and the subgingival flora: Subgingival microbiota of gastrostomy tube-fed children and healthy controls. Chen C, et al. 1163
The relationship between gingivitis and the serum antibodies to the microbiota associated with periodontal disease in children with Down's syndrome. Morinushi T, et al. 626
GINGIVITIS/therapy
Treatment of gingivitis and periodontitis. Position paper. 1246
GLASS, BIOLOGICALLY ACTIVE
Comparison of porous bone material and biologically active glass in critical-sized defects. Schmitt JM, et al. 1043
GLUCURONIDASE
Inflammatory and immune mediators in crevicular fluid from HIV-infected injecting drug users. Grbic JT, et al. 249
GLYCOSAMINOGLYCANS
Comparative results of cyclosporin on glycosaminoglycan synthesis by gingival fibroblasts. Newell J, et al. 443
Phenotype expression of gingival fibroblasts cultured on membranes used in guided tissue regeneration. Locci P, et al. 857
GRAFTS, BONE
Abscess formation around a hydroxyapatite-coated implant placed into the extraction socket with autogenous bone graft. A histological study using light microscopy, image processing, and confocal laser scanning microscopy. Takeshita F, et al. 299
A clinical evaluation of guided tissue regeneration with a bioabsorbable matrix membrane combined with an allograft bone graft. A series of case reports. Harris RJ. 598
Comparison of bioabsorbable laminar bone membrane and non-resorbable ePTFE membrane in mandibular furcations. Scott TA, et al. 679
Placement of implants into fresh extraction sites: 4 to 7 years retrospective evaluation of 95 immediate implants. Schwartz-Arad D, et al. 1110
GRAFTS, DEMINERALIZED FREEZE-DRIED
Effects of guided bone regeneration around commercially pure titanium and hydroxyapatite-coated den-

tal implants. I. Radiographic analysis. Stentz WC, et al. 199
GRAFTS, GINGIVAL
Clinical evaluation of tetracycline HCl conditioning in the treatment of gingival recessions. A comparative study. Bouchard P, et al. 262
A comparative study of root coverage obtained with guided tissue regeneration utilizing a bioabsorbable membrane versus the connective tissue with partial-thickness double pedicle graft. Harris RJ. 779
Creeping attachment associated with the connective tissue with partial-thickness double pedicle graft. Harris RJ. 890
Report of a gingival "surgical cyst" developing secondarily to a subepithelial connective tissue graft. Breault LG, et al. 392
GRAFTS, SOFT TISSUE
The thickness of masticatory mucosa in the human hard palate and tuberosity as potential donor sites for ridge augmentation procedures. Studer SP, et al. 145
GRANULOMA, GIANT CELL
Recurrent peripheral giant cell granuloma associated with cervical resorption. Nedir R, et al. 381
GROWTH FACTOR, INSULIN-LIKE
A phase I/II clinical trial to evaluate a combination of recombinant human platelet-derived growth factor-BB and recombinant human insulin-like growth factor-I in patients with periodontal disease. Howell TH, et al. 1186
GROWTH FACTOR, PLATELET-DERIVED
A phase I/II clinical trial to evaluate a combination of recombinant human platelet-derived growth factor-BB and recombinant human insulin-like growth factor-I in patients with periodontal disease. Howell TH, et al. 1186
Phenytoin and cyclosporine A specifically regulate macrophage phenotype and expression of platelet-derived growth factor and interleukin-1 in vitro and in vivo: Possible molecular mechanism of drug-induced gingival hyperplasia. Iacopino AM, et al. 73
GUIDED TISSUE REGENERATION
Assessment of guided tissue regeneration procedures in intrabony defects with bioabsorbable and non-resorbable barriers. Weltman R, et al. 582
Bacterial adherence to guided tissue regeneration barrier membranes exposed to the oral environment. Chen Y-T, et al. 172
A bone regenerative approach to alveolar ridge maintenance following tooth extraction. Report of 10 cases. Lekovic V, et al. 563
A clinical evaluation of guided tissue regeneration with a bioabsorbable matrix membrane combined with an allograft bone graft. A series of case reports. Harris RJ. 598
Comparison of a bioabsorbable GTR barrier to a non-absorbable barrier in treating human Class II furcation defects. A multi-center parallel design randomized single-blind trial. Garrett S, et al. 667
Comparison of bioresorbable laminar bone membrane and non-resorbable ePTFE membrane in mandibular furcations. Scott TA, et al. 679
A comparative study of root coverage obtained with guided tissue regeneration utilizing a bioabsorbable membrane versus the connective tissue with partial-thickness double pedicle graft. Harris RJ. 779
Development and clinical evaluation of a root coverage procedure using a collagen barrier membrane. Shieh A-T, et al. 770
Evidence for healing of Class II and III furcations after GTR therapy: Digital subtraction and clinical measurements. Eickholz P, et al. 636
Guided periodontal tissue regeneration in Class II furcation defects following treatment with a synthetic bioabsorbable membrane. Hürzeler MB, et al. 498
Guided periodontal tissue regeneration in interproximal intrabony defects following treatment with a synthetic bioabsorbable membrane. Hürzeler MB, et al. 489
Guided tissue regeneration therapy of 203 consecutively treated intrabony defects using a bioabsorbable matrix barrier. Clinical and radiographic findings. Falk H, et al. 571
Guided tissue regeneration using a bioabsorbable membrane in the treatment of human buccal recession. A re-entry study. Waterman CA. 982
Histological comparison of early wound healing following dense hydroxyapatite granule grafting and barrier placement in surgically-created bone defects neighboring implants. Takeshita F, et al. 924
Integrated connective tissue in bioabsorbable barrier material and periodontal regeneration. Zucchelli G, et al. 996
Periodontal regeneration by application of recombinant human bone morphogenetic protein-2 to horizontal circumferential defects created by experimental periodontitis in beagle dogs. Kinoshita A, et al. 103
Periodontal regeneration in naturally occurring Class II furcation defects in beagle dogs after guided tissue regeneration with bioabsorbable barriers. Bogle G, et al. 536
Phenotype expression of gingival fibroblasts cultured on membranes used in guided tissue regeneration. Locci P, et al. 857
Protease profiles of cells isolated from regenerative membranes are associated with clinical outcomes. Grosso LT, et al. 809
Vascular response to guided tissue regeneration procedures using nonresorbable and bioresorbable membranes in dogs. Vergara JA, et al. 217

H

HALITOSIS/diagnosis
Correlation between measurements using a new halitosis monitor and organoleptic assessment. Shimura M, et al. 1182
HALITOSIS/prevention and control

Reduction of oral malodor by oxidizing lozenges. Greenstein RB-N, et al. 1176
HEART TRANSPLANTATION/complications
Periodontal management of gingival overgrowth in the heart transplant patient: A case report. Khocht A, et al. 1140
HELIOBACTER PYLORI
Oral carriage of *Heliobacter pylori*: A review. Madinier IM, et al. 2
HEMOGLOBIN A, GLYCOSYLATED
The relationship between clinical periodontal status and insulin-dependent diabetes mellitus. Results after 5 years. Firatli E. 136
HEXETIDINE/therapeutic use
In vitro antifungal properties of mouthrinses containing antimicrobial agents. Giuliana G, et al. 728
HISTIOCYTOSIS, NON-LANGERHANS CELL
Host defensive, immunological, and microbiological observations of an early-onset periodontitis patient with virus-associated hemophagocytic syndrome. Kono T, et al. 1223
HIV-SERONEGATIVITY
Inflammatory and immune mediators in crevicular fluid from HIV-infected injecting drug users. Grbic JT, et al. 249
Periodontal status of HIV-1 and HIV-2 seropositive and HIV seronegative female commercial sex workers in Senegal. Ndiaye CF, et al. 827
HIV-1
Periodontal status of HIV-1 and HIV-2 seropositive and HIV seronegative female commercial sex workers in Senegal. Ndiaye CF, et al. 827
HIV-2
Periodontal status of HIV-1 and HIV-2 seropositive and HIV seronegative female commercial sex workers in Senegal. Ndiaye CF, et al. 827
HIV-SEROPOSITIVITY
Inflammatory and immune mediators in crevicular fluid from HIV-infected injecting drug users. Grbic JT, et al. 249
Periodontal status of HIV-1 and HIV-2 seropositive and HIV seronegative female commercial sex workers in Senegal. Ndiaye CF, et al. 827
HIV INFECTIONS
CD30+ lymphocytes in chronic gingivitis from HIV-positive patients: A pilot study. Gomez RS, et al. 881
Periodontal status of HIV-1 and HIV-2 seropositive and HIV seronegative female commercial sex workers in Senegal. Ndiaye CF, et al. 827
HOST-PARASITE REACTION
Host defensive, immunological, and microbiological observations of an early-onset periodontitis patient with virus-associated hemophagocytic syndrome. Kono T, et al. 1223
HYBRIDIZATION
Subgingival microbiota in adult Chinese: Prevalence and relation to periodontal disease progression. Papapanou PN, et al. 651
HYDROXYAPATITE
Abscess formation around a hydroxyapatite-coated implant placed into the extraction socket with autogenous bone graft. A histological study using light microscopy, image processing, and confocal laser scanning microscopy. Takeshita F, et al. 299
The effects of diabetes on the interface between hydroxyapatite implants and bone in rat tibia. Takeshita F, et al. 180
Effects of guided bone regeneration around commercially pure titanium and hydroxyapatite-coated dental implants. I. Radiographic analysis. Stentz WC, et al. 199
Effects of guided bone regeneration around commercially pure titanium and hydroxyapatite-coated dental implants. II. Histologic analysis. Stentz WC, et al. 933
Effects of hydroxyapatite particles on periodontal ligament fibroblast-like cell behavior. Alliot-Licht B, et al. 158
Experimental peri-implant tissue breakdown around hydroxyapatite-coated implants. Hanisch O, et al. 59
A study of the regional distribution of bone formed around hydroxyapatite implants in the tibiae of streptozotocin-induced diabetic rats using multiple fluorescent labeling and confocal laser scanning microscopy. Iyama S, et al. 1169
HYDROXYPATITE/therapeutic use
Histological comparison of early wound healing following dense hydroxyapatite granule grafting and barrier placement in surgically-created bone defects neighboring implants. Takeshita F, et al. 924
N-BIS-2 (HYDROXYLETHYL) AMINOACETATE-SODIUM-N
A short-term study of the effects of SBHAN, a novel compound, on gingival inflammation in the beagle dog. Cutler CW, et al. 448

I

IgA
Inflammatory and immune mediators in crevicular fluid from HIV-infected injecting drug users. Grbic JT, et al. 249
IgG
A comparison of IgG antibody reactive with *Bacteroides forsythus* and *Porphyromonas gingivalis* in adult and early-onset periodontitis. Califano JV, et al. 734
Inflammatory and immune mediators in crevicular fluid from HIV-infected injecting drug users. Grbic JT, et al. 249
Relationship between serum antibody levels and subgingival colonization of *Porphyromonas gingivalis* in patients with various types of periodontitis. Kojima T, et al. 618
IgG2
The effect of smoking on serum IgG2 reactive with *Actinobacillus actinomycetemcomitans* in early-onset periodontitis patients. Tangada SD, et al. 842
IgM

Inflammatory and immune mediators in crevicular fluid from HIV-infected injecting drug users. Grbic JT, et al. 249
IMMUNOASSAY TECHNIQUES
Clinical and microbiological effects of subgingival antimicrobial irrigation with citric acid as evaluated by an enzyme immunoassay and culture analysis. Renvert S, et al. 346
INCISOR/anatomy and histology
Alveolar bone patterns in sickle cell anemia and nonsickle cell anemia adolescent Nigerians: A comparative study. Arowojolu MO, et al. 225
IN MEMORIAM 1149
INTERFERON-TYPE II
Host defensive, immunological, and microbiological observations of an early-onset periodontitis patient with virus-associated hemophagocytic syndrome. Kono T, et al. 1223
INFLAMMATION
Effect of inflammation on the proliferation of human gingival epithelial cells in vitro. Carro OM, et al. 1070
INFLAMMATION/diagnosis
Experimentally induced periodontitis in beagle dogs causes rapid increases in osteoclastic resorption of alveolar bone. Shibutani T, et al. 385
INTERLEUKIN-1
Cytokine production by oral and peripheral blood neutrophils in adult periodontitis. Galbraith GMP, et al. 832
The effects of epidermal growth factor interleukin-1, and phenytoin alone and in combination on C steroid conversions in fibroblasts. Soory M, et al. 819
Effects of interleukin-1 on matrix metalloproteinase-3-levels in human periodontal ligament cells. Nakaya H, et al. 517
Inflammatory and immune mediators in crevicular fluid from HIV-infected injecting drug users. Grbic JT, et al. 249
Inflammatory mediator response as a potential risk marker for periodontal diseases in insulin-dependent diabetes mellitus patients. Salvi GE, et al. 127
Phenytoin and cyclosporine A specifically regulate macrophage phenotype and expression of platelet-derived growth factor and interleukin-1 in vitro and in vivo: Possible molecular mechanism of drug-induced gingival hyperplasia. Iacopino AM, et al. 73
INTERLEUKIN-6
CD40 mediated activation of gingival and periodontal ligament fibroblasts. Sempowski GD, et al. 284
IRRITANTS
A mucosal irritancy test device for intraoral use in drugs. Wirthlin MR, et al. 746
ISRADIPINE/adverse effects
Regression of nifedipine-induced gingival hyperplasia following switch to a same class calcium channel blocker, isradipine. Westbrook P, et al. 645

J

JOURNAL OF PERIODONTOLOGY
Instructions to authors. 99

K

KERATIN
The structure of bovine periodontal ligament with special reference to the epithelial cell rests. Berkovitz BKB, et al. 905
KERATOCYSTS
Odontogenic keratocysts: Review of the literature and report of a case. Blanchard SB. 306

L

LABELING, MULTIPLE FLUORESCENT
A study of the regional distribution of bone formed around hydroxyapatite implants in the tibiae of streptozotocin-induced diabetic rats using multiple fluorescent labeling and confocal laser scanning microscopy. Iyama S, et al. 1169
LAMININ
Migration of gingival fibroblasts on fibronectin and laminin. Dean JW, III, et al. 750
LASER SURGERY
Carbon dioxide laser for de-epithelialization of periodontal flaps. Centty IG, et al. 763
LASERS
Effects of irradiation of an erbium:YAG laser on root surfaces. Yamaguchi H, et al. 1151
Gingival microcirculation response to tooth brushing measured by laser Doppler flowmetry. Perry DA, et al. 990
LASERS/adverse effects
Laser irradiation of bone. I. An in vitro study concerning the effects of the CO laser on oral mucosa and subjacent bone. Krause LS, et al. 872
LETTERS TO THE EDITOR 804, 1022
LEUKOCYTES, MONONUCLEAR
Fusobacterium nucleatum T18 aggregates human mononuclear cells and inhibits their PHS-stimulated proliferation. Haake SK, et al. 39
LIPOPOLYSACCHARIDE
Reactive change in proliferative activity of the junctional epithelium after topical application of lipopolysaccharide. Takata T, et al. 531
LOZENGES/therapeutic use
Reduction of oral malodor by oxidizing lozenges. Greenstein RB-N, et al. 1176
LYMPHOCYTES
CD30+ lymphocytes in chronic gingivitis from HIV-positive patients: A pilot study. Gomez RS, et al. 881

M

MACROPHAGES
Phenytoin and cyclosporine A specifically regulate

macrophage phenotype and expression of platelet-derived growth factor and interleukin-1 in vitro and in vivo: Possible molecular mechanism of drug-induced gingival hyperplasia. Iacopino AM, et al. 73
MEMBRANES, ARTIFICIAL
Assessment of guided tissue regeneration procedures in intrabony defects with bioabsorbable and non-resorbable barriers. Weltman R, et al. 582
Bacterial adherence to guided tissue regeneration barrier membranes exposed to the oral environment. Chen Y-T, et al. 172
A bone regenerative approach to alveolar ridge maintenance following tooth extraction. Report of 10 cases. Lekovic V, et al. 563
A clinical evaluation of guided tissue regeneration with a bioabsorbable matrix membrane combined with an allograft bone graft. A series of case reports. Harris RJ. 598
Comparison of a bioabsorbable GTR barrier to a non-absorbable barrier in treating human Class II furcation defects. A multi-center parallel design randomized single-blind trial. Garrett S, et al. 667
Comparison of bioabsorbable laminar bone membrane and non-resorbable ePTFE membrane in mandibular furcations. Scott TA, et al. 679
Effects of guided bone regeneration around commercially pure titanium and hydroxyapatite-coated dental implants. I. Radiographic analysis. Stentz WC, et al. 199
Effects of guided bone regeneration around commercially pure titanium and hydroxyapatite-coated dental implants. II. Histologic analysis. Stentz WC, et al. 933
Evidence for healing of Class II and III furcations after GTR therapy: Digital subtraction and clinical measurements. Eickholz P, et al. 636
Guided periodontal tissue regeneration in Class II furcation defects following treatment with a synthetic bioabsorbable membrane. Hürzeler MB, et al. 498
Guided periodontal tissue regeneration in interproximal intrabony defects following treatment with a synthetic bioabsorbable membrane. Hürzeler MB, et al. 489
Guided tissue regeneration therapy of 203 consecutively treated intrabony defects using a bioabsorbable matrix barrier. Clinical and radiographic findings. Falk H, et al. 571
Histological comparison of early wound healing following dense hydroxyapatite granule grafting and barrier placement in surgically-created bone defects neighboring implants. Takeshita F, et al. 924
Phenotype expression of gingival fibroblasts cultured on membranes used in guided tissue regeneration. Locci P, et al. 857
Protease profiles of cells isolated from regenerative membranes are associated with clinical outcomes. Grosso LT, et al. 809
Vascular response to guided tissue regeneration procedures using nonresorbable and bioabsorbable membranes in dogs. Vergara JA, et al. 217
MEMBRANES, BARRIER
Assessment of guided tissue regeneration procedures in intrabony defects with bioabsorbable and non-resorbable barriers. Weltman R, et al. 582
Bacterial adherence to guided tissue regeneration barrier membranes exposed to the oral environment. Chen Y-T, et al. 172
A bone regenerative approach to alveolar ridge maintenance following tooth extraction. Report of 10 cases. Lekovic V, et al. 563
A clinical evaluation of guided tissue regeneration with a bioabsorbable matrix membrane combined with an allograft bone graft. A series of case reports. Harris RJ. 598
Comparison of a bioabsorbable GTR barrier to a non-absorbable barrier in treating human Class II furcation defects. A multi-center parallel design randomized single-blind trial. Garrett S, et al. 667
Comparison of bioabsorbable laminar bone membrane and non-resorbable ePTFE membrane in mandibular furcations. Scott TA, et al. 679
A comparative study of root coverage obtained with guided tissue regeneration utilizing a bioabsorbable membrane versus the connective tissue with partial-thickness double pedicle graft. Harris RJ. 779
Development and clinical evaluation of a root coverage procedure using a collagen barrier membrane. Shieh A-T, et al. 770
Effects of guided bone regeneration around commercially pure titanium and hydroxyapatite-coated dental implants. I. Radiographic analysis. Stentz WC, et al. 199
Effects of guided bone regeneration around commercially pure titanium and hydroxyapatite-coated dental implants. II. Histologic analysis. Stentz WC, et al. 933
Evidence for healing of Class II and III furcations after GTR therapy: Digital subtraction and clinical measurements. Eickholz P, et al. 636
Guided periodontal tissue regeneration in Class II furcation defects following treatment with a synthetic bioabsorbable membrane. Hürzeler MB, et al. 498
Guided periodontal tissue regeneration in interproximal intrabony defects following treatment with a synthetic bioabsorbable membrane. Hürzeler MB, et al. 489
Guided tissue regeneration therapy of 203 consecutively treated intrabony defects using a bioabsorbable matrix barrier. Clinical and radiographic findings. Falk H, et al. 571
Guided tissue regeneration using a bioabsorbable membrane in the treatment of human buccal recession. A re-entry study. Waterman CA. 982
Histological comparison of early wound healing following dense hydroxyapatite granule grafting and barrier placement in surgically-created bone defects neighboring implants. Takeshita F, et al. 924
Periodontal regeneration in naturally occurring Class II furcation defects in beagle dogs after guided tissue

regeneration with bioabsorbable barriers. Bogle G, et al. 536
Phenotype expression of gingival fibroblasts cultured on membranes used in guided tissue regeneration. Locci P, et al. 857
Protease profiles of cells isolated from regenerative membranes are associated with clinical outcomes. Grosso LT, et al. 809
Vascular response to guided tissue regeneration procedures using nonresorbable and bioabsorbable membranes in dogs. Vergara JA, et al. 217
METALLOPROTEINASES
Effects of interleukin-1 on matrix metalloproteinase-3 levels in human periodontal ligament cells. Nakaya H, et al. 517
METALLOTHIONEIN/analysis
Distribution of metallothionein in cigarette smokers and non-smokers in advanced periodontitis patients. Katsuragi H, et al. 1005
METRONIDAZOLE/therpeutic use
Effects of combined topical metronidazole and mechanical treatment on the subgingival flora in deep periodontal pockets in cuspids and bicuspids. Hitzig C, et al. 613
MICROCIRCULATION
Gingival microcirculation response to tooth brushing measured by laser Doppler flowmetry. Perry DA, et al. 990
MICROBIOLOGICAL ASSAY
Association of oral spirochetes from sites of periodontal health with development of periodontitis. Riviere GR, et al. 1210
Periodontal tissue disposition of azithromycin. Malizia T, et al. 1206
MICROSCOPY, CONFOCAL LASER
Abscess formation around a hydroxyapatite-coated implant placed into the extraction socket with autogenous bone graft. A histological study using light microscopy, image processing, and confocal laser scanning microscopy. Takeshita F, et al. 299
A study of the regional distribution of bone formed around hydroxyapatite implants in the tibiae of streptozotocin-induced diabetic rats using multiple fluorescent labeling and confocal laser scanning microscopy. Iyama S, et al. 1169
MINERALIZATION
Expression of extracellular matrix proteins in human periodontal ligament cells during mineralization in vitro. Nohutcu RM, et al. 320
MINOCYCLINE/adverse effects
Minocycline-induced intraoral pharmacogenic pigmentation: Case reports and review of the literature. Westbury LW, et al. 84
MINOCYCLINE/therapeutic use
Clinical and microbiological effects of minocycline-loaded microcapsules in adult periodontitis. Yeom H-R, et al. 1102
The effects of different tetracyclines on the dentin root surface of instrumented, periodontally involved human teeth: A comparative scanning electron microscope study. Madison JG, III, et al. 739
MODELS, BIOLOGICAL
An investigation of preferential fibroblast wound repopulation using a novel in vitro wound model. al-Khateeb T, et al. 1063
A quantitative assessment of osteoinductivity of human demineralized bone matrix. Zhang M, et al. 1076
MOIRE TOPOGRAPHY
Quantitative measurement of volume changes induced by oral plastic surgery: Validation of an optical method using different geometrically-formed specimens. Studer SP, et al. 950
MOLAR/anatomy and histology
Alveolar bone patterns in sickle cell anemia and non-sickle cell anemia adolescent Nigerians: A comparative study. Arowojolu MO, et al. 225
Cervical enamel projection and intermediate bifurcational ridge correlated with molar furcation involvements. Hou G-L, et al. 687
MONITORS
Correlation between measurements using a new halitosis monitor and organoleptic assessment. Shimura M, et al. 1182
MOUTH, EDENTULOUS
Periodontal bacteria colonizing oral mucous membranes in edentulous patients wearing dental implants. Danser MM, et al. 209
MOUTH MUCOSA
Laser irradiation of bone. I. An in vitro study concerning the effects of the CO_2 laser on oral mucosa and subjacent bone. Krause LS, et al. 872
A mucosal irritancy test device for intraoral use in drugs. Wirthlin MR, et al. 746
MOUTH MUCOSA/anatomy and histology
The thickness of masticatory mucosa in the human hard palate and tuberosity as potential donor sites for ridge augmentation procedures. Studer SP, et al. 145
MOUTH NEOPLASMS/therapy
Periodontal considerations in the management of the cancer patient. Position paper. 791
MOUTHRINSES/therapeutic use
In vitro antifungal properties of mouthrinses containing antimicrobial agents. Giuliana G, et al. 728
MUCOSITIS
Spontaneous bony exposure: A report of 4 cases of idiopathic exposure and sequestration of alveolar bone. Sonnier KE, et al. 758
MULTI-CENTER STUDIES
Comparison of a bioabsorbable GTR barrier to a non-absorbable barrier in treating human Class II furcation defects. A multi-center parallel design randomized single-blind trial. Garrett S, et al. 667
Multi-center comparative evaluation of subgingivally delivered sanguinarine and doxycycline in the treatment of periodontitis. I. Study design, procedures, and management. Polson AM, et al. 110
Multi-center comparative evaluation of subgingivally delivered sanguinarine and doxycycline in the treat-

ment of periodontitis. II. Clinical results. Polson AM, et al. 119
Sustained local delivery of chlorhexidine in the treatment of periodontitis: A multi-center study. Soskolne WA, et al. 32

N

NEUTROPENIA
Periodontal findings in Cohen syndrome with chronic neutropenia. Alaluusua S, et al. 473
NEUTROPHILS
Cytokine production by oral and peripheral blood neutrophils in adult periodontitis. Galbraith GMP, et al. 832
Host defensive, immunological, and microbiological observations of an early-onset periodontitis patient with virus-associated hemophagocytic syndrome. Kono T, et al. 1223
NIFEDIPINE/adverse effects
Periodontal management of gingival overgrowth in the heart transplant patient: A case report. Khocht A, et al. 1140
Regression of nifedipine-induced gingival hyperplasia following switch to a same class calcium channel blocker, isradipine. Westbrook P, et al. 645

O

OBITUARIES
Hine, Maynard K. 396
Ramfjord, Sigurd Peder. 1147
ODONTOGENIC CYSTS
Odontogenic keratocysts: Review of the literature and report of a case. Blanchard SB. 306
ODONTOGENIC TUMOR
Odontogenic myxofibroma arising from the periodontal ligament in the maxillary molar region. Okada H, et al. 479
ORAL HYGIENE
Gingival microcirculation response to tooth brushing measured by laser Doppler flowmetry. Perry DA, et al. 990
ORGANOLEPTIC ASSESSMENT
Correlation between measurements using a new halitosis monitor and organoleptic assessment. Shimura M, et al. 1182
OSSEOINTEGRATION
Effects of guided bone regeneration around commercially pure titanium and hydroxyapatite-coated dental implants. I. Radiographic analysis. Stentz WC, et al. 199
Effects of guided bone regeneration around commercially pure titanium and hydroxyapatite-coated dental implants. II. Histologic analysis. Stentz WC, et al. 933
Experimentally induced periodontitis in beagle dogs causes rapid increases in osteoclastic resorption of alveolar bone. Shibutani T, et al. 385
OSTEOCLASTS
Local delivery of an amino bisphosphonate prevents the resorptive phase of alveolar bone following mucoperiosteal flap surgery in rats. Yaffe A, et al. 884
OSTEOGENESIS
Effect(s) of the demineralization process on the osteoinductivity of demineralized bone matrix. Zhang M, et al. 1085
OSTEOPOROSIS, POSTMENOPAUSAL
The association between estrogen status and alveolar bone density changes in postmenopausal women with a history of periodontitis. Payne JB, et al. 24
OUTCOME ASSESSMENT
Guided tissue regeneration therapy of 203 consecutively treated intrabony defects using a bioabsorbable matrix barrier. Clinical and radiographic findings. Falk H, et al. 571
Protease profiles of cells isolated from regenerative membranes are associated with clinical outcomes. Grosso LT, et al. 809
OVARIECTOMY/adverse effects
Alveolar bone loss one year following ovariectomy in sheep. Johnson RB, et al. 864

P

PATIENT CARE PLANNING
Blur reduction of conventional film-based tomograms for presurgical evaluation of potential mandibular implant sites. Mayfield-Donahoo TL, et al. 362
Periodontal considerations in the management of the cancer patient. Position paper. 791
PCR
Oral food consumption and the subgingival flora: Subgingival microbiota of gastrostomy tube-fed children and healthy controls. Chen C, et al. 1163
PERIODONTAL ABSCESS
Tooth loss due to periodontal abscess: A retrospective study. McLeod DE, et al. 963
PERIODONTAL ATTACHMENT
Important differences in clinical data from third, second, and first generation periodontal probes. Breen HJ, et al. 335
Results of limited initial periodontal therapy in smokers and non-smokers. Pucher JJ, et al. 851
A study of the reliability of a no disease progression conclusion. Hujoel PP. 152
Tetracycline fibers plus scaling and root planing versus scaling and root planing alone: Similar results after 5 years. Wilson TG, Jr., et al. 1029
PERIODONTAL ATTACHMENT LOSS
Clinical classification of periodontitis in adolescents and young adults. Albandar JM, et al. 545
The influence of anatomic and iatrogenic surface characteristics on bacterial colonization and periodontal destruction: A review. Leknes KN. 507
Pathologic migration of anterior teeth in patients with

moderate to severe periodontitis. Towfighi PP, et al. 967
A 10-year study of the progression of destructive periodontal disease in adult and elderly Chinese. Baelum V, et al. 1033
PERIODONTAL CYSTS
Osseous repair of a lateral periodontal cyst. Lehrhaupt NB, et al. 608
Traumatic bone cyst resembling apical periodontitis. Rosen DJ, et al. 1019
PERIODONTAL DISEASES
The relationship between clinical periodontal status and insulin-dependent diabetes mellitus. Results after 5 years. Firatli E. 136
PERIODONTAL DISEASES/diagnosis
Comparison of manual and automated probing in an untreated periodontitis population. Oringer RJ, et al. 1156
Contemporary interpretation of probing depth assessments: Diagnostic and therapeutic implications. Greenstein G. 1194
Distribution of metallothionein in cigarette smokers and non-smokers in advanced periodontitis patients. Katsuragi H, et al. 1005
Morphometric analysis of cellular and vascular changes in gingival connective tissue in long-term insulin-dependent diabetes. Seppälä B, et al. 1237
Option-4 algorithm for automated disc probe: Reduction in the variance of site-specific relative attachment level measurements. Breen HJ, et al. 456
A study of the reliability of a no disease progression conclusion. Hujoel PP. 152
PERIODONTAL DISEASES/drug therapy
The effect of smoking on mechanical and antimicrobial periodontal therapy. Kinane DF, et al. 467
PERIODONTAL DISEASES/epidemiology
CD30+ lymphocytes in chronic gingivitis from HIV-positive patients: A pilot study. Gomez RS, et al. 881
Subgingival microbiota in adult Chinese: Prevalence and relation to periodontal disease progression. Papapanou PN, et al. 651
A 10-year study of the progression of destructive periodontal disease in adult and elderly Chinese. Baelum V, et al. 1033
PERIODONTAL DISEASES/etiology
Alveolar bone loss one year following ovariectomy in sheep. Johnson RB, et al. 864
Experimental peri-implantitis in consecutively placed, loaded root-form and plate-form implants in adult *Macaca mulatta* monkeys. Fritz ME, et al. 1131
The influence of anatomic and iatrogenic surface characteristics on bacterial colonization and periodontal destruction: A review. Leknes KN. 507
Manifestations of insulin-dependent diabetes mellitus in the periodontium of young Brazilian patients. A 10-year follow-up study. Novaes AB, Jr., et al. 328
A mucosal irritancy test device for intraoral use in drugs. Wirthlin MR, et al. 746
The relationship between gingivitis and the serum antibodies to the microbiota associated with periodontal disease in children with Down's syndrome. Morinushi T, et al.
PERIODONTAL DISEASES/microbiology
Bacterial transmission in periodontal diseases: A critical review. Greenstein G, et al. 421
Periodontal findings in Cohen syndrome with chronic neutropenia. Alaluusua S, et al. 473
Subgingival microbiota in adult Chinese: Prevalence and relation to periodontal disease progression. Papapanou PN, et al. 651
PERIODONTAL DISEASES/pathogenesis
Development and characterization of a transformed human periodontal ligament cell line. Hoang AM, et al. 1054
Effects of interleukin-1β on matrix metalloproteinase-3-levels in human periodontal ligament cells. Nakaya H, et al. 517
Fusobacterium nucleatum T18 aggregates human mononuclear cells and inhibits their PHS-stimulated proliferation. Haake SK, et al. 39
PERIODONTAL DISEASES/physiopathology
A quantitative assessment of osteoinductivity of human demineralized bone matrix. Zhang M, et al. 1076
Effect(s) of the demineralization process on the osteoinductivity of demineralized bone matrix. Zhang M, et al. 1085
PERIODONTAL DISEASES/prevention and control
Root planing following short-term pocket distention. Shen E-C, et al. 632
PERIODONTAL DISEASES/radiography
Periodontal findings in Cohen syndrome with chronic neutropenia. Alaluusua S, et al. 473
PERIODONTAL DISEASES/surgery
Assessment of guided tissue regeneration procedures in intrabony defects with bioabsorbable and non-resorbable barriers. Weltman R, et al. 582
Carbon dioxide laser for de-epithelialization of periodontal flaps. Centty IG, et al. 763
A clinical evaluation of guided tissue regeneration with a bioresorbable matrix membrane combined with an allograft bone graft. A series of case reports. Harris RJ. 598
Guided periodontal tissue regeneration in Class II furcation defects following treatment with a synthetic bioabsorbable membrane. Hürzeler MB, et al. 498
Guided periodontal tissue regeneration in interproximal intrabony defects following treatment with a synthetic bioabsorbable membrane. Hürzeler MB, et al. 489
Guided tissue regeneration therapy of 203 consecutively treated intrabony defects using a bioabsorbable matrix barrier. Clinical and radiographic findings. Falk H, et al. 571
Healing of intrabony defects and its relationship to root canal therapy. A histologic and histometric study in dogs. Lima LA, et al. 240
Integrated connective tissue in bioabsorbable barrier material and periodontal regeneration. Zucchelli G, et al. 996
A phase I/II clinical trial to evaluate a combination of

recombinant human platelet-derived growth factor-BB and recombinant human insulin-like growth factor-I in patients with periodontal disease. Howell TH, et al. 1186

PERIODONTAL DISEASES/therapy
Carbon dioxide laser for de-epithelialization of periodontal flaps. Centty IG, et al. 763
Contemporary interpretation of probing depth assessments: Diagnostic and therapeutic implications. Greenstein G. 1194
Damping characteristics of teeth with periodontal breakdown: Correlation of mobility meter values with bone and attachment loss. Demirel K, et al. 166
The effect of smoking on mechanical and antimicrobial periodontal therapy. Kinane DF, et al. 467
Effects of irradiation of an erbium:YAG laser on root surfaces. Yamaguchi H, et al. 1151
Guided periodontal tissue regeneration in Class II furcation defects following treatment with a synthetic bioabsorbable membrane. Hürzeler MB, et al. 498
Guided periodontal tissue regeneration in interproximal intrabony defects following treatment with a synthetic bioabsorbable membrane. Hürzeler MB, et al. 489
Results of limited initial periodontal therapy in smokers and non-smokers. Pucher JJ, et al. 851
Tooth loss due to periodontal abscess: A retrospective study. McLeod DE, et al. 963
Treatment of periodontal disease in diabetes reduces glycated hemoglobin. Grossi SG, et al. 713

PERIODONTAL DISEASES/transmission
Bacterial transmission in periodontal diseases: A critical review. Greenstein G, et al. 421

PERIODONTAL LIGAMENT
CD40 mediated activation of gingival and periodontal ligament fibroblasts. Sempowski GD, et al. 284
Development and characterization of a transformed human periodontal ligament cell line. Hoang AM, et al. 1054
Odontogenic myxofibroma arising from the periodontal ligament in the maxillary molar region. Okada H, et al. 479

PERIODONTAL LIGAMENT/anatomy and histology
Cells with osteoblastic phenotypes can be explanted from human gingiva and periodontal ligament. Carnes DL, et al. 701
Effects of interleukin-1β on matrix metalloproteinase-3-levels in human periodontal ligament cells. Nakaya H, et al. 517

PERIODONTAL LIGAMENT/physiology
Effects of hydroxyapatite particles on periodontal ligament fibroblast-like cell behavior. Alliot-Licht B, et al. 158
Expression of extracellular matrix proteins in human periodontal ligament cells during mineralization in vitro. Nohutcu RM, et al. 320

PERIODONTAL LIGAMENT/ultrastructure
The structure of bovine periodontal ligament with special reference to the epithelial cell rests. Berkovitz BKB, et al. 905

PERIODONTAL POCKETS
A correlation study of inflammatory cell mobilization in response to subgingival microbial colonization. Leknes KN, et al. 67

PERIODONTAL POCKETS/etiology
Reactive change in proliferative activity of the junctional epithelium after topical application of lipopolysaccharide. Takata T, et al. 531

PERIODONTAL POCKETS/pathogenesis
Exocellular phospholipase C activity from a *Propionibacterium acnes* strain isolated from a periodontal pocket. Bulkacz J, et al. 369

PERIODONTAL PROBES
Comparison of manual and automated probing in an untreated periodontitis population. Oringer RJ, et al. 1156
Contemporary interpretation of probing depth assessments: Diagnostic and therapeutic implications. Greenstein G. 1194
Important differences in clinical data from third, second, and first generation periodontal probes. Breen HJ, et al. 335
Option-4 algorithm for automated disc probe: Reduction in the variance of site-specific relative attachment level measurements. Breen HJ, et al. 456

PERIODONTAL REGENERATION
Integrated connective tissue in bioabsorbable barrier material and periodontal regeneration. Zucchelli G, et al. 996
Periodontal regeneration in naturally occurring Class II furcation defects in beagle dogs after guided tissue regeneration with bioabsorbable barriers. Bogle G, et al. 536
A phase I/II clinical trial to evaluate a combination of recombinant human platelet-derived growth factor-BB and recombinant human insulin-like growth factor-I in patients with periodontal disease. Howell TH, et al. 1186

PERIODONTITIS
Active and α-1 proteinase inhibitor complexed leukocyte elastase levels in crevicular fluid from patients with periodontal diseases. Meyer J, et al. 256

PERIODONTITIS/complications
Relationship between molar root fusion and localized periodontitis. Hou G-L, et al. 313

PERIODONTITIS/drug therapy
Clinical and microbiological effects of minocycline-loaded microcapsules in adult periodontitis. Yeom H-R, et al. 1102
Multi-center comparative evaluation of subgingivally delivered sanguinarine and doxycycline in the treatment of periodontitis. I. Study design, procedures, and management. Polson AM, et al. 110
Multi-center comparative evaluation of subgingivally delivered sanguinarine and doxycycline in the treatment of periodontitis. II. Clinical results. Polson AM, et al. 119
Sustained local delivery of chlorhexidine in the treatment of periodontitis: A multi-center study. Soskolne WA, et al. 32

PERIODONTITIS/etiology
Reactive change in proliferative activity of the junctional epithelium after topical application of lipopolysaccharide. Takata T, et al. 531
PERIODONTITIS/microbiology
Association of oral spirochetes from sites of periodontal health with development of periodontitis. Riviere GR, et al. 1210
A comparison of IgG antibody reactive with *Bacteroides forsythus* and *Porphyromonas gingivalis* in adult and early-onset periodontitis. Califano JV, et al. 734
A correlation study of inflammatory cell mobilization in response to subgingival microbial colonization. Leknes KN, et al. 67
Effects of combined topical metronidazole and mechanical treatment on the subgingival flora in deep periodontal pockets in cuspids and bicuspids. Hitzig C, et al. 613
Occurrence of *Porphyromonas gingivalis, Bacteroides forsythus,* and *Treponema denticola* in periodontally healthy and diseased subjects as determined by an ELISA technique. Di Murro C, et al. 18
Periodontal bacteria colonizing oral mucous membranes in edentulous patients wearing dental implants. Danser MM, et al. 209
Relationship between serum antibody levels and subgingival colonization of *Porphyromonas gingivalis* in patients with various types of periodontitis. Kojima T, et al. 618
The survival rate of *Actinobacillus actinomycetemcomitans, Porphyromonas gingivalis,* and *Bacteroides forsythus* following 4 randomized treatment modalities. Shiloah J, et al. 720
PERIODONTITIS/pathogenesis
Cytokine production by oral and peripheral blood neutrophils in adult periodontitis. Galbraith GMP, et al. 832
Experimental peri-implant tissue breakdown around hydroxyapatite-coated implants. Hanisch O, et al. 59
The vasculature in chronic adult periodontitis: A qualitative and quantitative study. Bonakdar MPS, et al. 50
PERIODONTITIS/surgery
Periodontal regeneration by application of recombinant human bone morphogenetic protein-2 to horizontal circumferential defects created by experimental periodontitis in beagle dogs. Kinoshita A, et al. 103
PERIODONTITIS/therapy
Effects of combined topical metronidazole and mechanical treatment on the subgingival flora in deep periodontal pockets in cuspids and bicuspids. Hitzig C, et al. 613
Periodontal regeneration by application of recombinant human bone morphogenetic protein-2 to horizontal circumferential defects created by experimental periodontitis in beagle dogs. Kinoshita A, et al. 103
The survival rate of *Actinobacillus actinomycetemcomitans, Porphyromonas gingivalis,* and *Bacteroides forsythus* following 4 randomized treatment modalities. Shiloah J, et al. 720
Treatment of gingivitis and periodontitis. Position paper. 1246
PERIODONTITIS, APICAL
Traumatic bone cyst resembling apical periodontitis. Rosen DJ, et al. 1019
PERIODONTITIS, EARLY-ONSET
Clinical classification of periodontitis in adolescents and young adults. Albandar JM, et al. 545
The effect of smoking on serum IgG2 reactive with *Actinobacillus actinomycetemcomitans* in early-onset periodontitis patients. Tangada SD, et al. 842
Host defensive, immunological, and microbiological observations of an early-onset periodontitis patient with virus-associated hemophagocytic syndrome. Kono T, et al. 1223
PERIODONTITIS, EARLY-ONSET/microbiology
A comparison of IgG antibody reactive with *Bacteroides forsythus* and *Porphyromonas gingivalis* in adult and early-onset periodontitis. Califano JV, et al. 734
Putative periodontal pathogens in subgingival plaque of young adults with and without early-onset periodontitis. Albandar JM, et al. 973
Relationship between serum antibody levels and subgingival colonization of *Porphyromonas gingivalis* in patients with various types of periodontitis. Kojima T, et al. 618
PERIODONTITIS, EARLY-ONSET/pathogenesis
Putative periodontal pathogens in subgingival plaque of young adults with and without early-onset periodontitis. Albandar JM, et al. 973
PERIODONTITIS, EXPERIMENTAL
Experimentally induced periodontitis in beagle dogs causes rapid increases in osteoclastic resorption of alveolar bone. Shibutani T, et al. 385
PERIODONTITIS, JUVENILE
Clinical classification of periodontitis in adolescents and young adults. Albandar JM, et al. 545
The effect of smoking on serum IgG2 reactive with *Actinobacillus mycetemcomitans* in early-onset periodontitis patients. Tangada SD, et al. 842
PERIODONTITIS, JUVENILE/microbiology
Alveolar bone loss in rats infected with a strain of *Prevotella intermedia* and *Fusobacterium nucleatum* isolated from a child with prepubertal periodontitis. Yoshida-Minami I, et al. 12
PERIODONTITIS, RAPIDLY PROGRESSIVE/etiology
Manifestations of insulin-dependent diabetes mellitus in the periodontium of young Brazilian patients. A 10-year follow-up study. Novaes AB, Jr., et al. 328
PERIODONTITIS, REFRACTORY/therapy
The use of tetracycline-containing controlled-release fibers in the treatment of refractory periodontitis. Vandekerckhove BNA, et al. 353
PERIODONTIUM
Migration of gingival fibroblasts on fibronectin and laminin. Dean JW, III, et al. 750
Progressive cervical root resorption related to tetracy-

cline root conditioning. Ben-Yehouda A. 432; erratum. 808
PERIODONTIUM/microbiology
Periodontal tissue disposition of azithromycin. Malizia T, et al. 1206
PERIODONTIUM/physiology
Damping characteristics of teeth with periodontal breakdown: Correlation of mobility meter values with bone and attachment loss. Demirel K, et al. 166
PHENOTYPE
Cells with osteoblastic phenotypes can be explanted from human gingiva and periodontal ligament. Carnes DL, et al. 701
The effects of epidermal growth factor, interleukin-1, and phenytoin alone and in combination on C_{19} steroid conversions in fibroblasts. Soory M, et al. 819
PHENYTOIN/adverse effects
Myofibroblasts in phenytoin-induced hyperplastic connective tissue in the rat and in human gingival overgrowth. Dill RE, et al. 375
Phenytoin and cyclosporine A specifically regulate macrophage phenotype and expression of platelet-derived growth factor and interleukin-1 in vitro and in vivo: Possible molecular mechanism of drug-induced gingival hyperplasia. Iacopino AM, et al. 73
PHOSPHOLIPASES
Exocellular phospholipase C activity from a *Propionibacterium acnes* strain isolated from a periodontal pocket. Bulkacz J, et al. 369
PIGMENTATION DISORDERS/etiology
Minocycline-induced intraoral pharmacogenic pigmentation: Case reports and review of the literature. Westbury LW, et al. 84
PLANING
Clinical and microbiological effects of subgingival antimicrobial irrigation with citric acid as evaluated by an enzyme immunoassay and culture analysis. Renvert S, et al. 346
The effect of smoking on mechanical and antimicrobial periodontal therapy. Kinane DF, et al. 467
Healing of intrabony defects and its relationship to root canal therapy. A histologic and histometric study in dogs. Lima LA, et al. 240
Root planing following short-term pocket distention. Shen E-C, et al. 632
The survival rate of *Actinobacillus actinomycetemcomitans, Porphyromonas gingivalis,* and *Bacteroides forsythus* following 4 randomized treatment modalities. Shiloah J, et al. 720
Tetracycline fibers plus scaling and root planing versus scaling and root planing alone: Similar results after 5 years. Wilson TG, Jr., et al. 1029
PLANING/instrumentation
Clinical evaluation of the speed and effectiveness of subgingival calculus removal on single-rooted teeth with diamond-coated ultrasonic tips. Yukna RA, et al. 436
PLASMA/microbiology
Periodontal tissue disposition of azithromycin. Malizia T, et al. 1206
PLASTICS
Migration of gingival fibroblasts on fibronectin and laminin. Dean JW, III, et al. 750
POLYLACTIC ACID
Bacterial adherence to guided tissue regeneration barrier membranes exposed to the oral environment. Chen Y-T, et al. 172
Comparison of a bioabsorbable GTR barrier to a non-absorbable barrier in treating human Class II furcation defects. A multi-center parallel design randomized single-blind trial. Garrett S, et al. 667
A comparative study of root coverage obtained with guided tissue regeneration utilizing a bioabsorbable membrane versus the connective tissue with partial-thickness double pedicle graft. Harris RJ. 779
POLYLACTIC ACID/therapeutic use
Assessment of guided tissue regeneration procedures in intrabony defects with bioabsorbable and non-resorbable barriers. Weltman R, et al. 582
A clinical evaluation of guided tissue regeneration with a bioresorbable matrix membrane combined with an allograft bone graft. A series of case reports. Harris RJ. 598
Guided tissue regeneration using a bioabsorbable membrane in the treatment of human buccal recession. A re-entry study. Waterman CA. 982
POLYTETRAFLUOROETHYLENE
Bacterial adherence to guided tissue regeneration barrier membranes exposed to the oral environment. Chen Y-T, et al. 172
POLYTETRAFLUOROETHYLENE/therapeutic use
Assessment of guided tissue regeneration procedures in intrabony defects with bioabsorbable and non-resorbable barriers. Weltman R, et al. 582
A bone regenerative approach to alveolar ridge maintenance following tooth extraction. Report of 10 cases. Lekovic V, et al. 563
Comparison of a bioabsorbable GTR barrier to a non-absorbable barrier in treating human Class II furcation defects. A multi-center parallel design randomized single-blind trial. Garrett S, et al. 667
Comparison of bioabsorbable laminar bone membrane and non-resorbable ePTFE membrane in mandibular furcations. Scott TA, et al. 679
Effects of guided bone regeneration around commercially pure titanium and hydroxyapatite-coated dental implants. II. Histologic analysis. Stentz WC, et al. 933
Evidence for healing of Class II and III furcations after GTR therapy: Digital subtraction and clinical measurements. Eickholz P, et al. 636
Histological comparison of early wound healing following dense hydroxyapatite granule grafting and barrier placement in surgically-created bone defects neighboring implants. Takeshita F, et al. 924
Phenotype expression of gingival fibroblasts cultured on membranes used in guided tissue regeneration. Locci P, et al. 857
Protease profiles of cells isolated from regenerative

membranes are associated with clinical outcomes. Grosso LT, et al. 809
Vascular response to guided tissue regeneration procedures using nonresorbable and bioabsorbable membranes in dogs. Vergara JA, et al. 217
PORPHYROMONAS GINGIVALIS
Association of oral spirochetes from sites of periodontal health with development of periodontitis. Riviere GR, et al. 1210
A comparison of IgG antibody reactive with *Bacteroides forsythus* and *Porphyromonas gingivalis* in adult and early-onset periodontitis. Califano JV, et al. 734
Occurrence of *Porphyromonas gingivalis, Bacteroides forsythus,* and *Treponema denticola* in periodontally healthy and diseased subjects as determined by an ELISA technique. Di Murro C, et al. 18
Relationship between serum antibody levels and subgingival colonization of *Porphyromonas gingivalis* in patients with various types of periodontitis. Kojima T, et al. 618
Subgingival microbiota in adult Chinese: Prevalence and relation to periodontal disease progression. Papapanou PN, et al. 651
Treatment of periodontal disease in diabetes reduces glycated hemoglobin. Grossi SG, et al. 713
POVIDONE-IODINE/therapeutic use
Treatment of periodontal disease in diabetes reduces glycated hemoglobin. Grossi SG, et al. 713
PREVOTELLA INTEMEDIA
Alveolar bone loss in rats infected with a strain of *Prevotella intermedia* and *Fusobacterium nucleatum* isolated from a child with prepubertal periodontitis. Yoshida-Minami I, et al. 12
PROGNOSIS
Guided tissue regeneration therapy of 203 consecutively treated intrabony defects using a bioabsorbable matrix barrier. Clinical and radiographic findings. Falk H, et al. 571
Tooth loss due to periodontal abscess: A retrospective study. McLeod DE, et al. 963
PROPIONIBACTERIUM ACNES
Exocellular phospholipase C activity from a *Propionibacterium acnes* strain isolated from a periodontal pocket. Bulkacz J, et al. 369
PROSTAGLANDIN E
Inflammatory mediator response as a potential risk marker for periodontal diseases in insulin-dependent diabetes mellitus patients. Salvi GE, et al. 127
PROTEASE INHIBITORS
Protease profiles of cells isolated from regenerative membranes are associated with clinical outcomes. Grosso LT, et al. 809
PROTEASES
Protease profiles of cells isolated from regenerative membranes are associated with clinical outcomes. Grosso LT, et al. 809
PROTEIN, BONE MORPHOGENIC
Periodontal regeneration by application of recombinant human bone morphogenetic protein-2 to horizontal circumferential defects created by experimental periodontitis in beagle dogs. Kinoshita A, et al. 103
PROTEINASE INHIBITOR/analysis
Active and α-1 proteinase inhibitor complexed leukocyte elastase levels in crevicular fluid from patients with periodontal diseases. Meyer J, et al. 256

R

RACIAL FACTORS
The effect of smoking on serum IgG2 reactive with *Actinobacillus actinomycetemcomitans* in early-onset periodontitis patients. Tangada SD, et al. 842
A 10-year study of the progression of destructive periodontal disease in adult and elderly Chinese. Baelum V, et al. 1033
RADIATION EFFECTS
Carbon dioxide laser for de-epithelialization of periodontal flaps. Centty IG, et al. 763
Periodontal considerations in the management of the cancer patient. Position paper. 791
RADIOGRAPHY, DENTAL
Evidence for healing of Class II and III furcations after GTR therapy: Digital subtraction and clinical measurements. Eickholz P, et al. 636
Radiographic measurement of alveolar bone loss in the living rat. Reymond F, et al. 141
RADIOGRAPHY, DENTAL/methods
Reproducibility of bone height measurements made on serial radiographs. Hausmann E, et al. 839
RADIOGRAPHY, DENTAL, SUBTRACTION TECHNIQUES
Evidence for healing of Class II and III furcations after GTR therapy: Digital subtraction and clinical measurements. Eickholz P, et al. 636
REPRODUCIBILITY OF RESULTS
Option-4 algorithm for automated disc probe: Reduction in the variance of site-specific relative attachment level measurements. Breen HJ, et al. 456
Reproducibility of bone height measurements made on serial radiographs. Hausmann E, et al. 839
RISK FACTORS
Association of oral spirochetes from sites of periodontal health with development of periodontitis. Riviere GR, et al. 1210
A 10-year study of the progression of destructive periodontal disease in adult and elderly Chinese. Baelum V, et al. 1033
ROOT CANAL THERAPY
Healing of intrabony defects and its relationship to root canal therapy. A histologic and histometric study in dogs. Lima LA, et al. 240
ROOT RESORPTION
Recurrent peripheral giant cell granuloma associated with cervical resorption. Nedir R, et al. 381
ROOT RESORPTION/etiology
Progressive cervical root resorption related to tetracycline root conditioning. Ben-Yehouda A. 432; erratum. 808

S

SALIVA/microbiology
Oral carriage of *Heliobacter pylori*: A review. Madinier IM, et al. 2
Periodontal tissue disposition of azithromycin. Malizia T, et al. 1206
SANGUINARINE/therapeutic use
In vitro antifungal properties of mouthrinses containing antimicrobial agents. Giuliana G, et al. 728
Multi-center comparative evaluation of subgingivally delivered sanguinarine and doxycycline in the treatment of periodontitis. I. Study design, procedures, and management. Polson AM, et al. 110
Multi-center comparative evaluation of subgingivally delivered sanguinarine and doxycycline in the treatment of periodontitis. II. Clinical results. Polson AM, et al. 119
SCALING
Clinical and microbiological effects of subgingival antimicrobial irrigation with citric acid as evaluated by an enzyme immunoassay and culture analysis. Renvert S, et al. 346
The effect of smoking on mechanical and antimicrobial periodontal therapy. Kinane DF, et al. 467
Healing of intrabony defects and its relationship to root canal therapy. A histologic and histometric study in dogs. Lima LA, et al. 240
Root planing following short-term pocket distention. Shen E-C, et al. 632
The survival rate of *Actinobacillus actinomycetemcomitans, Porphyromonas gingivalis,* and *Bacteroides forsythus* following 4 randomized treatment modalities. Shiloah J, et al. 720
Tetracycline fibers plus scaling and root planing versus scaling and root planing alone: Similar results after 5 years. Wilson TG, Jr., et al. 1029
SCALING/instrumentation
Clinical evaluation of the speed and effectiveness of subgingival calculus removal on single-rooted teeth with diamond-coated ultrasonic tips. Yukna RA, et al. 436
Comparative in vitro effectiveness of closed root debridement with fine instruments on specific areas of mandibular first molar. Furcations. I. Root trunk and furcation entrance. Otero-Cagide FJ, et al. 1093
Comparative in vitro effectiveness of closed root debridement with fine instruments on specific areas of mandibular first molar furcations. II. Furcation area. Otero-Cagide FJ, et al. 1098
The effectiveness of an aerosol reduction device for ultrasonic scalers. King TB, et al. 45
SCALING/methods
Comparative in vitro effectiveness of closed root debridement with fine instruments on specific areas of mandibular first molar. Furcations. I. Root trunk and furcation entrance. Otero-Cagide FJ, et al. 1093
Comparative in vitro effectiveness of closed root debridement with fine instruments on specific areas of mandibular first molar furcations. II. Furcation area. Otero-Cagide FJ, et al. 1098
The effectiveness of an aerosol reduction device for ultrasonic scalers. King TB, et al. 45
SELF MUTILATION
Role of psychiatric disorders in self-inflicted periodontal injury: A case report. Sandhu HS, et al. 1136
SEQUESTRUM
Spontaneous bony exposure: A report of 4 cases of idiopathic exposure and sequestration of alveolar bone. Sonnier KE, et al. 758
SERUM ALBUMIN, BOVINE
Migration of gingival fibroblasts on fibronectin and laminin. Dean JW, III, et al. 750
SEX FACTORS
Relationship between molar root fusion and localized periodontitis. Hou G-L, et al. 313
SMEAR LAYER
The effects of different tetracyclines on the dentin root surface of instrumented, periodontally involved human teeth: A comparative scanning electron microscope study. Madison JG, III, et al. 739
SMOKING/adverse effects
Damping characteristics of teeth with periodontal breakdown: Correlation of mobility meter values with bone and attachment loss. Demirel K, et al. 166
Distribution of metallothionein in cigarette smokers and non-smokers in advanced periodontitis patients. Katsuragi H, et al. 1005
The effect of smoking on mechanical and antimicrobial periodontal therapy. Kinane DF, et al. 467
The effect of smoking on serum IgG2 reactive with *Actinobacillus mycetemcomitans* in early-onset periodontitis patients. Tangada SD, et al. 842
Results of limited initial periodontal therapy in smokers and non-smokers. Pucher JJ, et al. 851
SOFT TISSUE
Biologic width around titanium implants. A histometric analysis of the implanto-gingival junction around unloaded and loaded nonsubmerged implants in the canine mandible. Cochran DL, et al. 186
SPIROCHAETALES, PATHOGEN ORAL-RELATED
Association of oral spirochetes from sites of periodontal health with development of periodontitis. Riviere GR, et al. 1210
STOMACH ULCER
Oral carriage of *Heliobacter pylori*: A review. Madinier IM, et al. 2
STOMATITIS/etiology
Periodontal management of gingival overgrowth in the heart transplant patient: A case report. Khocht A, et al. 1140
SUBSTANCE USE DISORDERS
Inflammatory and immune mediators in crevicular fluid from HIV-infected injecting drug users. Grbic JT, et al. 249
SUMYCIN/therapeutic use
The effects of different tetracyclines on the dentin root surface of instrumented, periodontally involved hu-

man teeth: A comparative scanning electron microscope study. Madison JG, III, et al. 739

SURGICAL FLAPS
Assessment of guided tissue regeneration procedures in intrabony defects with bioabsorbable and non-resorbable barriers. Weltman R, et al. 582
A bone regenerative approach to alveolar ridge maintenance following tooth extraction. Report of 10 cases. Lekovic V, et al. 563
Carbon dioxide laser for de-epithelialization of periodontal flaps. Centty IG, et al. 763
Clinical evaluation of tetracycline HCl conditioning in the treatment of gingival recessions. A comparative study. Bouchard P, et al. 262
Local delivery of an amino bisphosphonate prevents the resorptive phase of alveolar bone following mucoperiosteal flap surgery in rats. Yaffe A, et al. 884
Periodontal regeneration in naturally occurring Class II furcation defects in beagle dogs after guided tissue regeneration with bioabsorbable barriers. Bogle G, et al. 536
Placement of implants into fresh extraction sites: 4 to 7 years retrospective evaluation of 95 immediate implants. Schwartz-Arad D, et al. 1110
The survival rate of *Actinobacillus actinomycetemcomitans, Porphyromonas gingivalis,* and *Bacteroides forsythus* following 4 randomized treatment modalities. Shiloah J, et al. 720

T

TESTOSTERONE
The effects of epidermal growth factor, interleukin-1, and phenytoin alone and in combination on C_{19} steroid conversions in fibroblasts. Soory M, et al. 819

TETRACYCLINE/therapeutic use
A clinical evaluation of guided tissue regeneration with a bioabsorbable matrix membrane combined with an allograft bone graft. A series of case reports. Harris RJ. 598
Clinical evaluation of tetracycline HCl conditioning in the treatment of gingival recessions. A comparative study. Bouchard P, et al. 262
The effects of different tetracyclines on the dentin root surface of instrumented, periodontally involved human teeth: A comparative scanning electron microscope study. Madison JG, III, et al. 739
Progressive cervical root resorption related to tetracycline root conditioning. Ben-Yehouda A. 432; erratum. 808
Tetracycline fibers plus scaling and root planing versus scaling and root planing alone: Similar results after 5 years. Wilson TG, Jr., et al. 1029
The use of tetracycline-containing controlled-release fibers in the treatment of refractory periodontitis. Vandekerckhove BNA, et al. 353

TITANIUM
Biologic width around titanium implants. A histometric analysis of the implanto-gingival junction around unloaded and loaded nonsubmerged implants in the canine mandible. Cochran DL, et al. 186
Crestal bone changes around titanium implants. A radiographic evaluation of unloaded nonsubmerged and submerged implants in the canine mandible. Hermann JS, et al. 1117
The effect of surface roughness on early in vivo plaque colonization on titanium. Rimondini L, et al. 556
Effects of guided bone regeneration around commercially pure titanium and hydroxyapatite-coated dental implants. I. Radiographic analysis. Stentz WC, et al. 199
Effects of guided bone regeneration around commercially pure titanium and hydroxyapatite-coated dental implants. II. Histologic analysis. Stentz WC, et al. 933
Experimental peri-implant tissue breakdown around hydroxyapatite-coated implants. Hanisch O, et al. 59
Histological aspects of the bone and soft tissues surrounding three titanium non-submerged plasma-sprayed implants retrieved at autopsy: A case report. Piattelli A, et al. 694
A histological investigation on tissue responses to titanium implants in cortical bone of the rat femur. Ohtsu A, et al. 270
Immediate loading of titanium plasma-sprayed screw-shaped implants in man: A clinical and histological report of two cases. Piattelli A, et al. 591
Scanning electron microscopic evaluation on the effects of an air-abrasive system on dental implants: A comparative in vitro study between machined and plasma-sprayed titanium surfaces. Chairay J-P, et al. 1215

TOBACCO/adverse effects
Distribution of metallothionein in cigarette smokers and non-smokers in advanced periodontitis patients. Katsuragi H, et al. 1005

TOMOGRAPHY, CROSS-SECTIONAL
Blur reduction of conventional film-based tomograms for presurgical evaluation of potential mandibular implant sites. Mayfield-Donahoo TL, et al. 362

TOOTH/anatomy and histology
Damping characteristics of teeth with periodontal breakdown: Correlation of mobility meter values with bone and attachment loss. Demirel K, et al. 166

TOOTH ABNORMALITIES/epidemiology
Relationship between molar root fusion and localized periodontitis. Hou G-L, et al. 313

TOOTH BRUSHING
Gingival microcirculation response to tooth brushing measured by laser Doppler flowmetry. Perry DA, et al. 990

TOOTH EXTRACTION
A bone regenerative approach to alveolar ridge maintenance following tooth extraction. Report of 10 cases. Lekovic V, et al. 563

Placement of implants into fresh extraction sites: 4 to 7 years retrospective evaluation of 95 immediate implants. Schwartz-Arad D, et al. 1110
TOOTH LOSS
Tooth loss due to periodontal abscess: A retrospective study. McLeod DE, et al. 963
TOOTH MIGRATION
Gingival overgrowth and dental alveolar alterations: Possible mechanisms of cyclosporin-induced tooth migration. An experimental study in the rat. Fu E, et al. 1231
Pathologic migration of anterior teeth in patients with moderate to severe periodontitis. Towfighi PP, et al. 967
TOOTH ROOT
Clinical and microbiological effects of subgingival antimicrobial irrigation with citric acid as evaluated by an enzyme immunoassay and culture analysis. Renvert S, et al. 346
Comparative in vitro effectiveness of closed root debridement with fine instruments on specific areas of mandibular first molar furcations. I. Root trunk and furcation entrance. Otero-Cagide FJ, et al. 1093
Comparative in vitro effectiveness of closed root debridement with fine instruments on specific areas of mandibular first molar furcations. II. Furcation area. Otero-Cagide FJ, et al. 1098
Creeping attachment associated with the connective tissue with partial-thickness double pedicle graft. Harris RJ. 890
The effects of different tetracyclines on the dentin root surface of instrumented, periodontally involved human teeth: A comparative scanning electron microscope study. Madison JG, III, et al. 739
Effects of irradiation of an erbium:YAG laser on root surfaces. Yamaguchi H, et al. 1151
Recurrent peripheral giant cell granuloma associated with cervical resorption. Nedir R, et al. 381
Tetracycline fibers plus scaling and root planing versus scaling and root planing alone: Similar results after 5 years. Wilson TG, Jr., et al. 1029
TOOTH ROOT/abnormalities
Relationship between molar root fusion and localized periodontitis. Hou G-L, et al. 313
TOOTH ROOT/anatomy and histology
The influence of anatomic and iatrogenic surface characteristics on bacterial colonization and periodontal destruction: A review. Leknes KN. 507
TREPONEMA DENTICOLA
Association of oral spirochetes from sites of periodontal health with development of periodontitis. Riviere GR, et al. 1210
Differential attachment of oral *Trepenemes* to monolayers of epithelial cells. Carranza N, Jr. 1010
Occurrence of *Porphyromonas gingivalis, Bacteroides forsythus,* and *Treponema denticola* in periodontally healthy and diseased subjects as determined by an ELISA technique. Di Murro C, et al. 18
Subgingival microbiota in adult Chinese: Prevalence and relation to periodontal disease progression. Papapanou PN, et al. 651
TREPONEMA PALLIDUM
Differential attachment of oral *Trepenemes* to monolayers of epithelial cells. Carranza N, Jr. 1010
TREPONEMA PHAGEDENIS
Differential attachment of oral *Trepenemes* to monolayers of epithelial cells. Carranza N, Jr. 1010
TREPONEMA SCOLIODONTUM
Differential attachment of oral *Trepenemes* to monolayers of epithelial cells. Carranza N, Jr. 1010
TREPONEMA SOCRANSKII
Association of oral spirochetes from sites of periodontal health with development of periodontitis. Riviere GR, et al. 1210
Differential attachment of oral *Trepenemes* to monolayers of epithelial cells. Carranza N, Jr. 1010
TREPONEMA VINCENTII
Differential attachment of oral *Trepenemes* to monolayers of epithelial cells. Carranza N, Jr. 1010
TRICLOSAN/therapeutic use
In vitro antifungal properties of mouthrinses containing antimicrobial agents. Giuliana G, et al. 728
TUMOR NECROSIS FACTOR
Cytokine production by oral and peripheral blood neutrophils in adult periodontitis. Galbraith GMP, et al. 832

U

ULTRASONICS/instrumentation
The effectiveness of an aerosol reduction device for ultrasonic scalers. King TB, et al. 45
ULTRASONICS/methods
The effectiveness of an aerosol reduction device for ultrasonic scalers. King TB, et al. 45

V

VIRUS-ASSOCIATED HEMOPHAGOCYTIC SYNDROME
Host defensive, immunological, and microbiological observations of an early-onset periodontitis patient with virus-associated hemophagocytic syndrome. Kono T, et al. 1223

W

WOUND HEALING
Guided periodontal tissue regeneration in Class II furcation defects following treatment with a synthetic bioabsorbable membrane. Hürzeler MB, et al. 498
Guided periodontal tissue regeneration in interproximal intrabony defects following treatment with a synthetic bioabsorbable membrane. Hürzeler MB, et al. 489
Healing of intrabony defects and its relationship to

root canal therapy. A histologic and histometric study in dogs. Lima LA, et al. 240

An investigation of preferential fibroblast wound repopulation using a novel in vitro wound model. al-Khateeb T, et al. 1063

Migration of gingival fibroblasts on fibronectin and laminin. Dean JW, III, et al. 750

Myofibroblasts in phenytoin-induced hyperplastic connective tissue in the rat and in human gingival overgrowth. Dill RE, et al. 375

Placement of implants into fresh extraction sites: 4 to 7 years retrospective evaluation of 95 immediate implants. Schwartz-Arad D, et al. 1110

The ways and wherefores of immediate placement of implants into fresh extraction sites: A literature review. Schwartz-Arad D, et al. 915
